The story behind Unify Hub

Since Covid-19, people need powerful cloud storage more than ever.

We have developed a meaningful technology that solves the issues of remote working and cloud integration.

Hybrid working isn't something going away anytime soon....

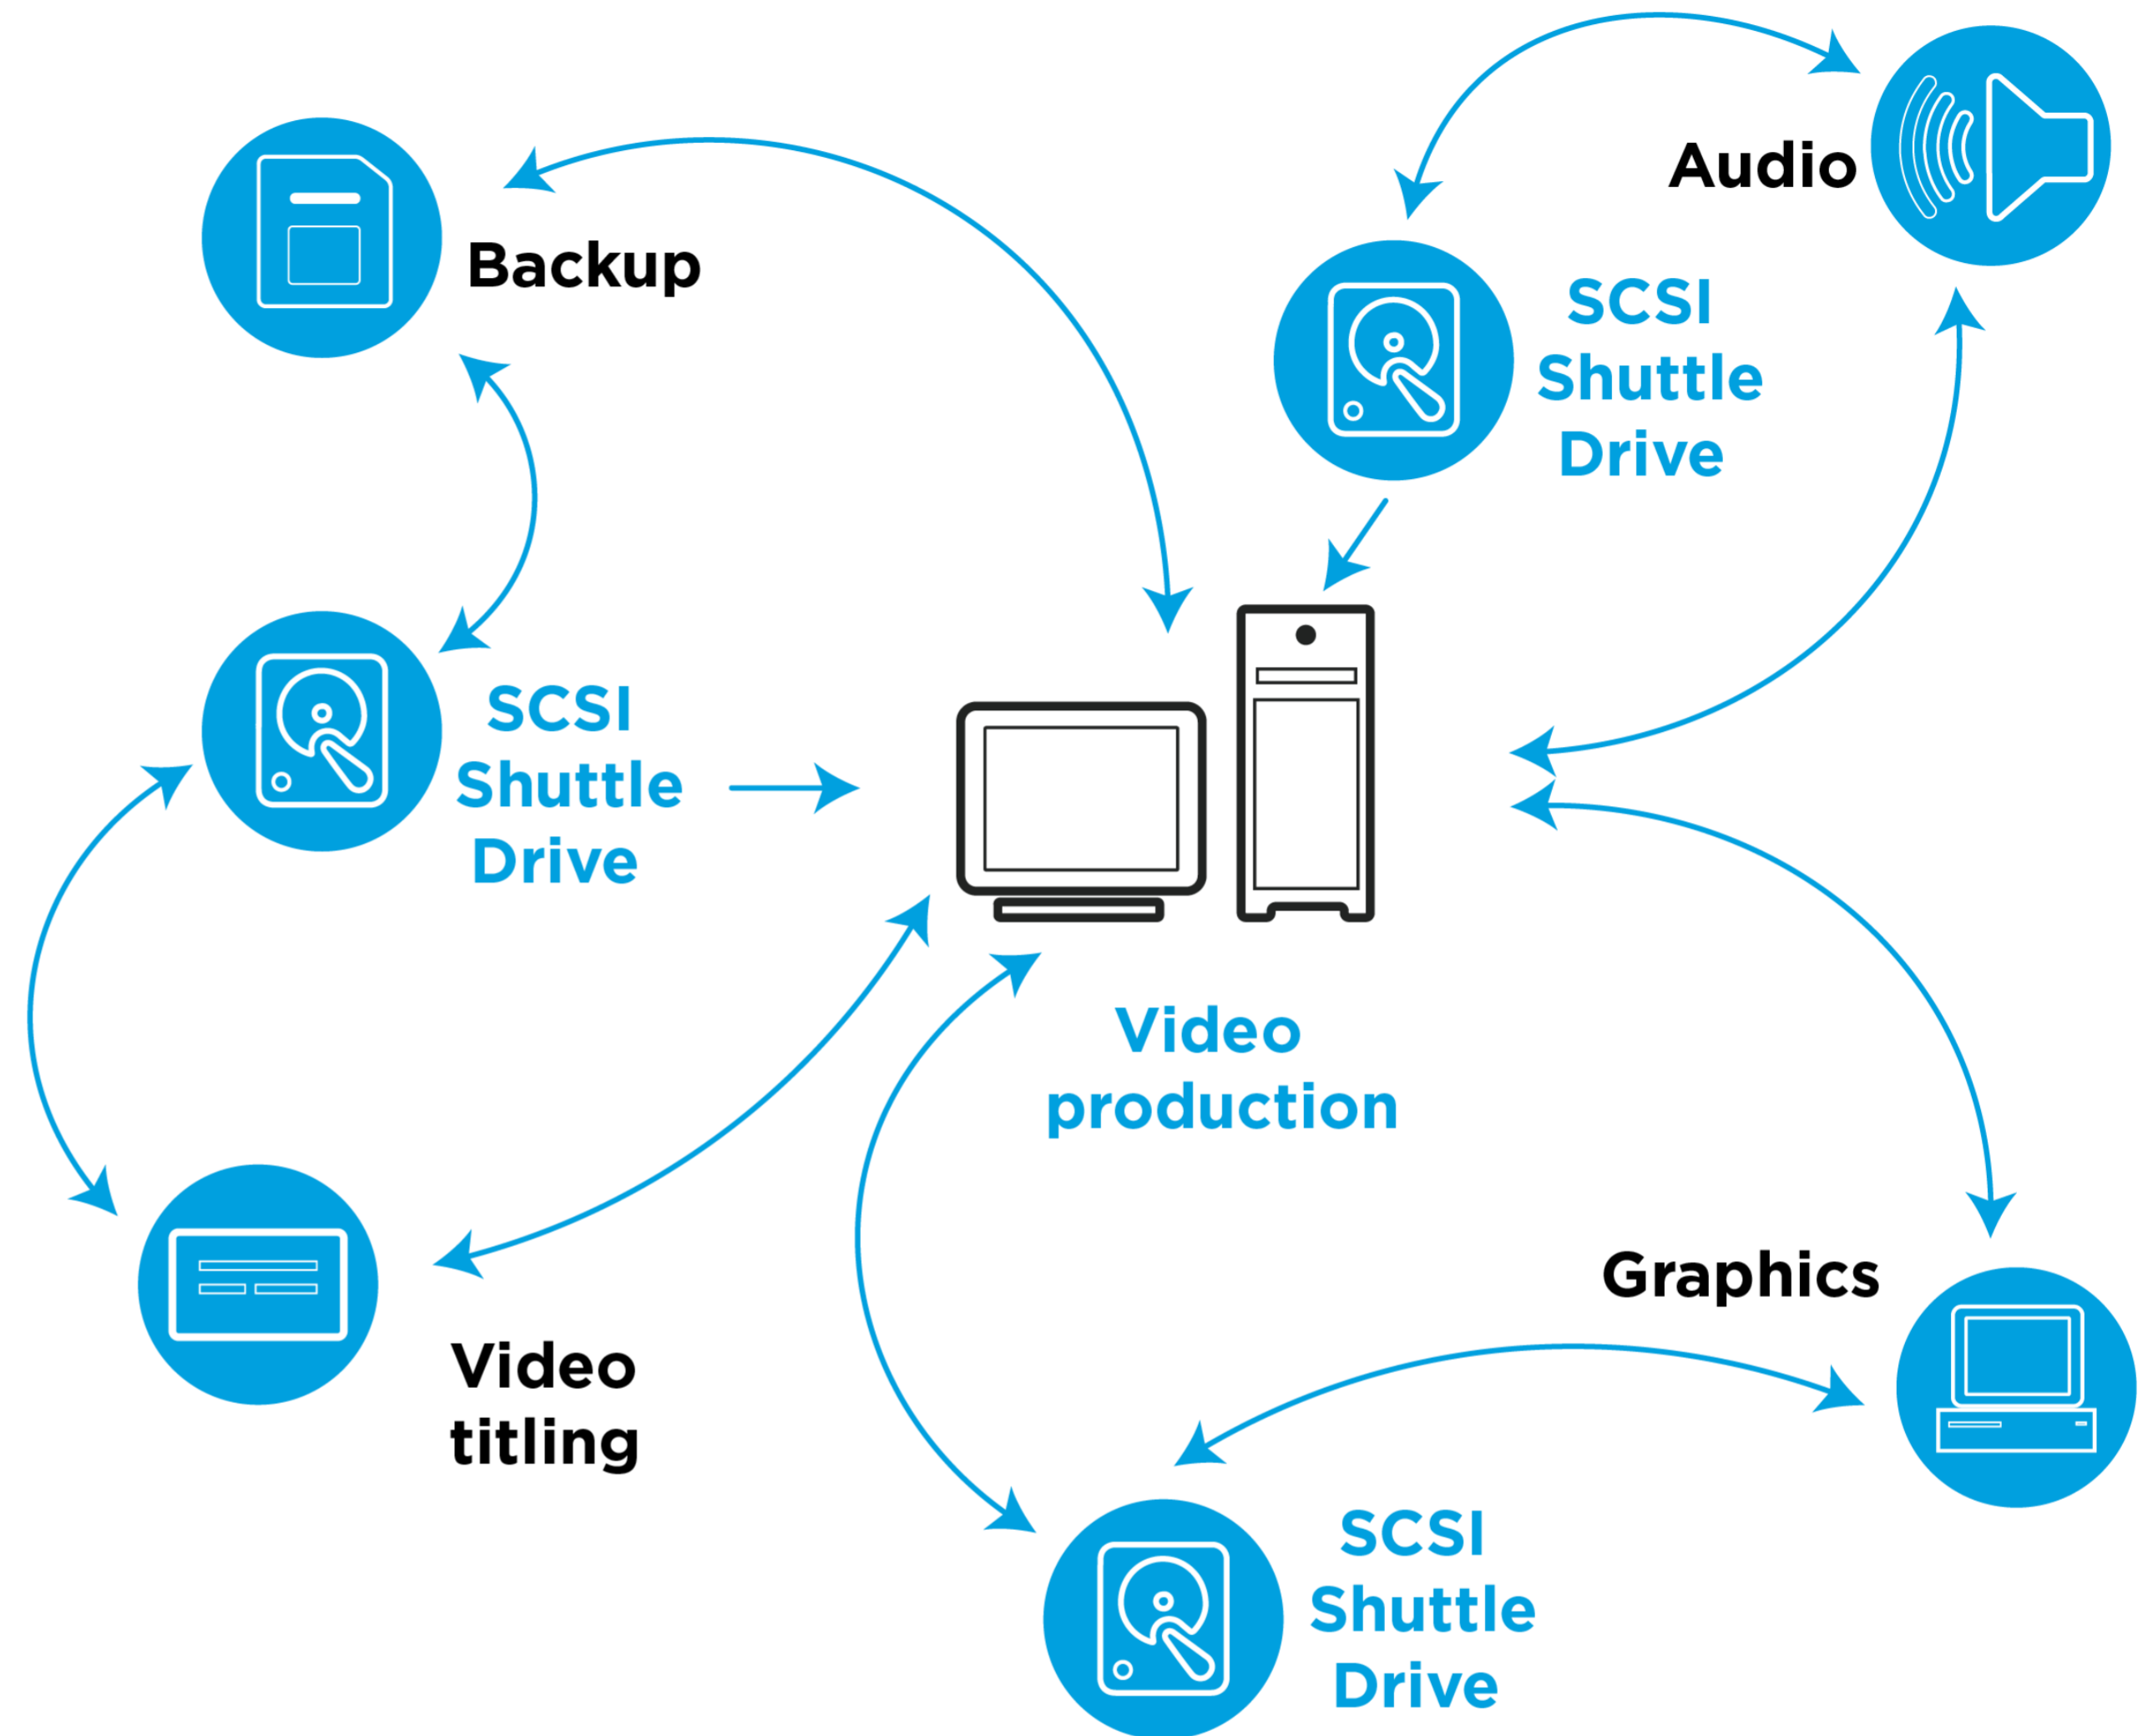

In the beginning...

A popular workflow 15-20 years ago...

Standalone systems working as 'islands of data'

Disadvantages

- Slow
- Data duplication
- High risk of data loss
- Poor security
- Non-scalable

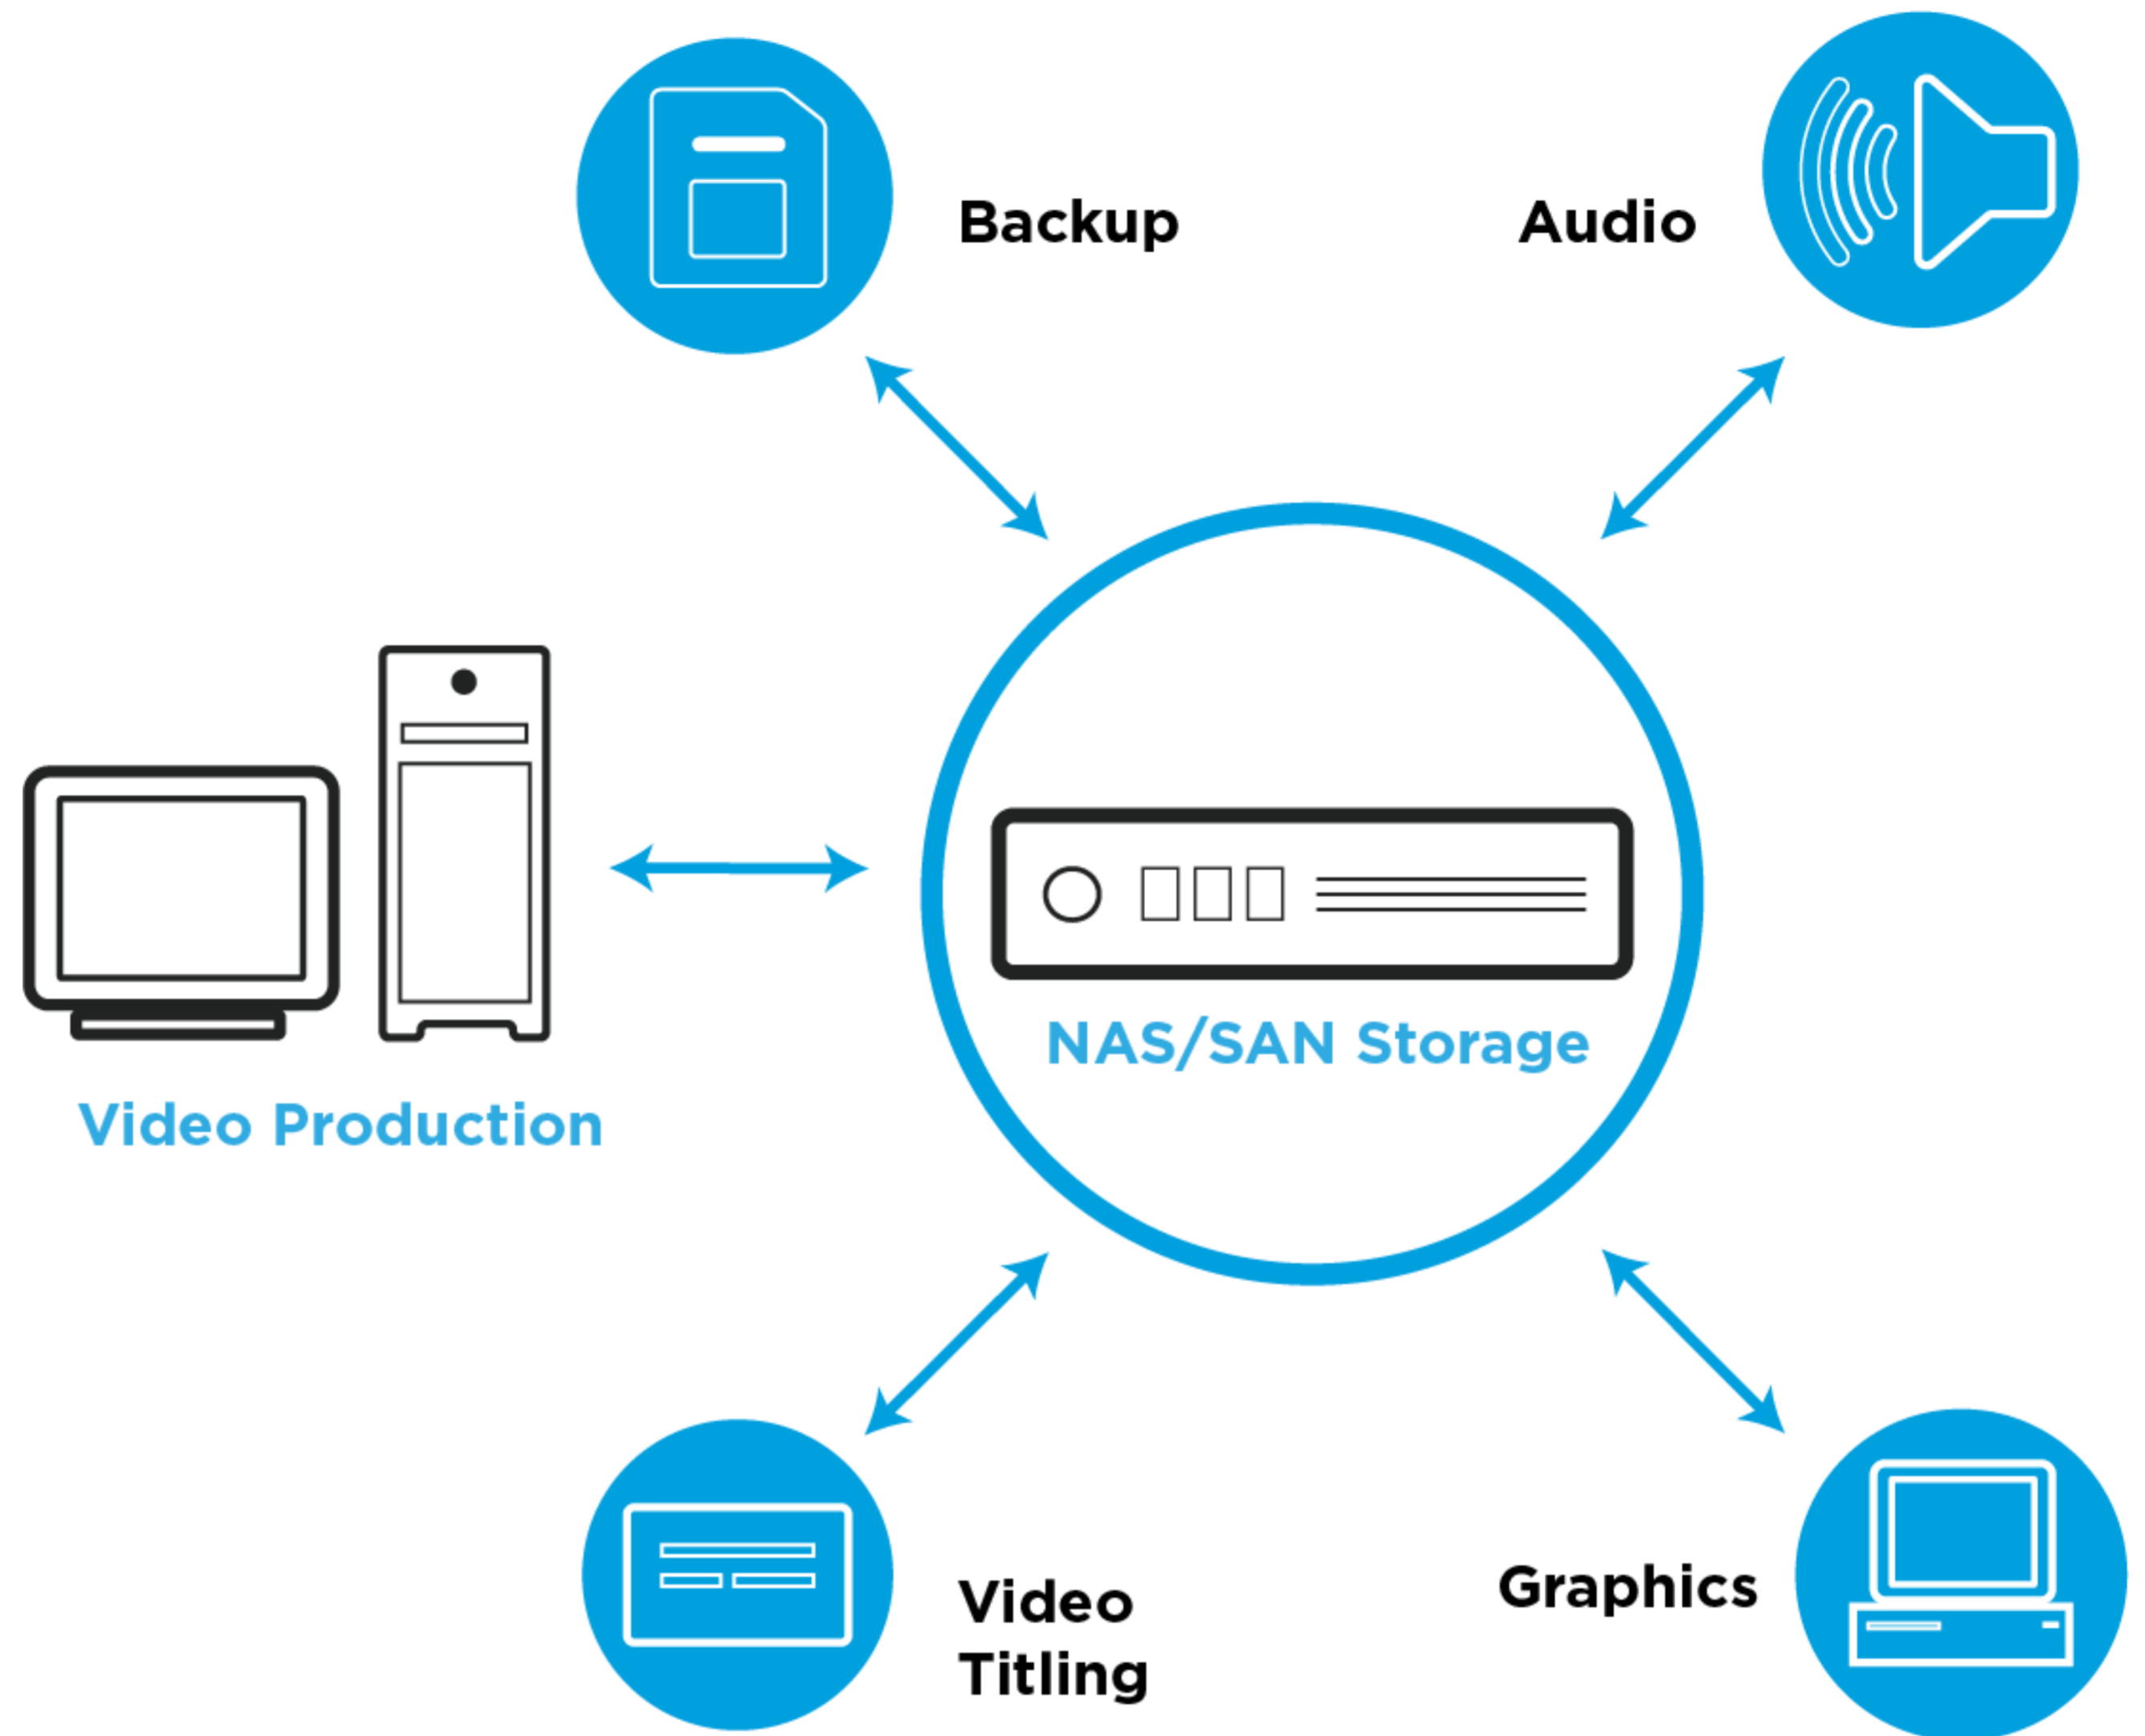

Up until fairly recently...

High speed NAS/SAN
allows true collaborative
working

Advantages:

Instant access
One set of data
Efficiency
Secure
Highly scalable

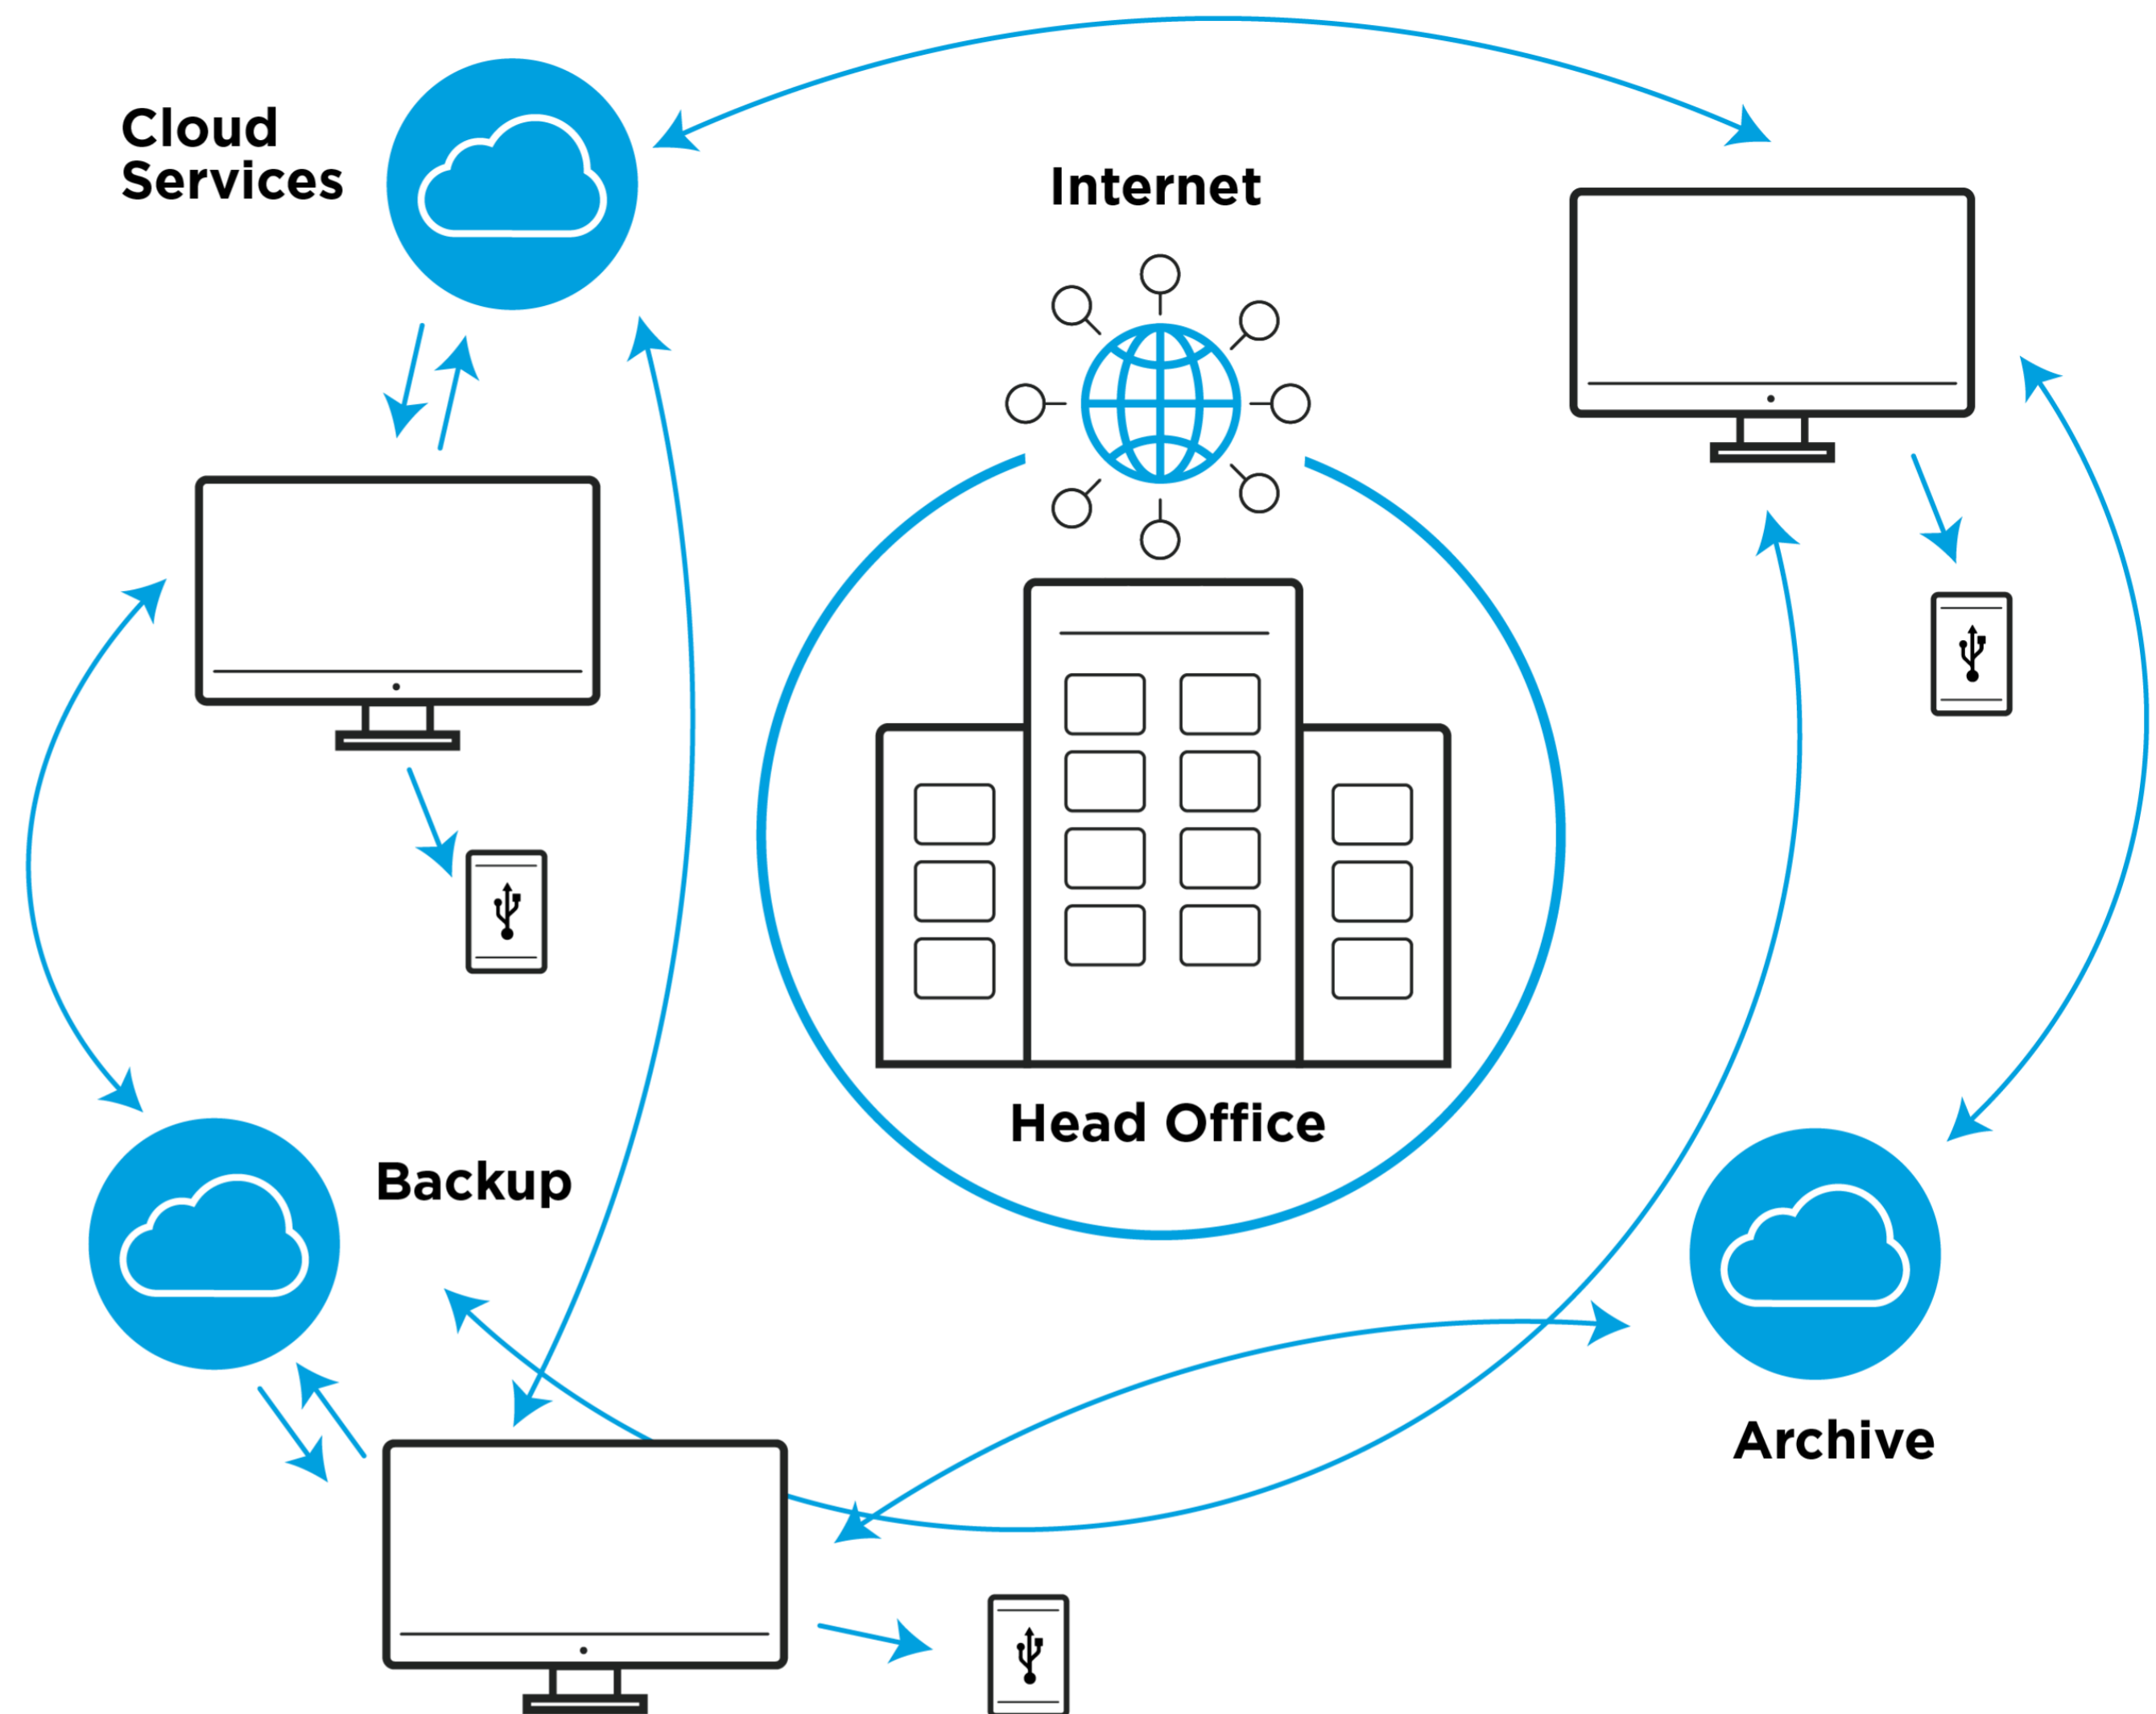

Present day

Data all over the place and multiple copies being generated

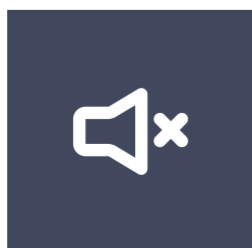

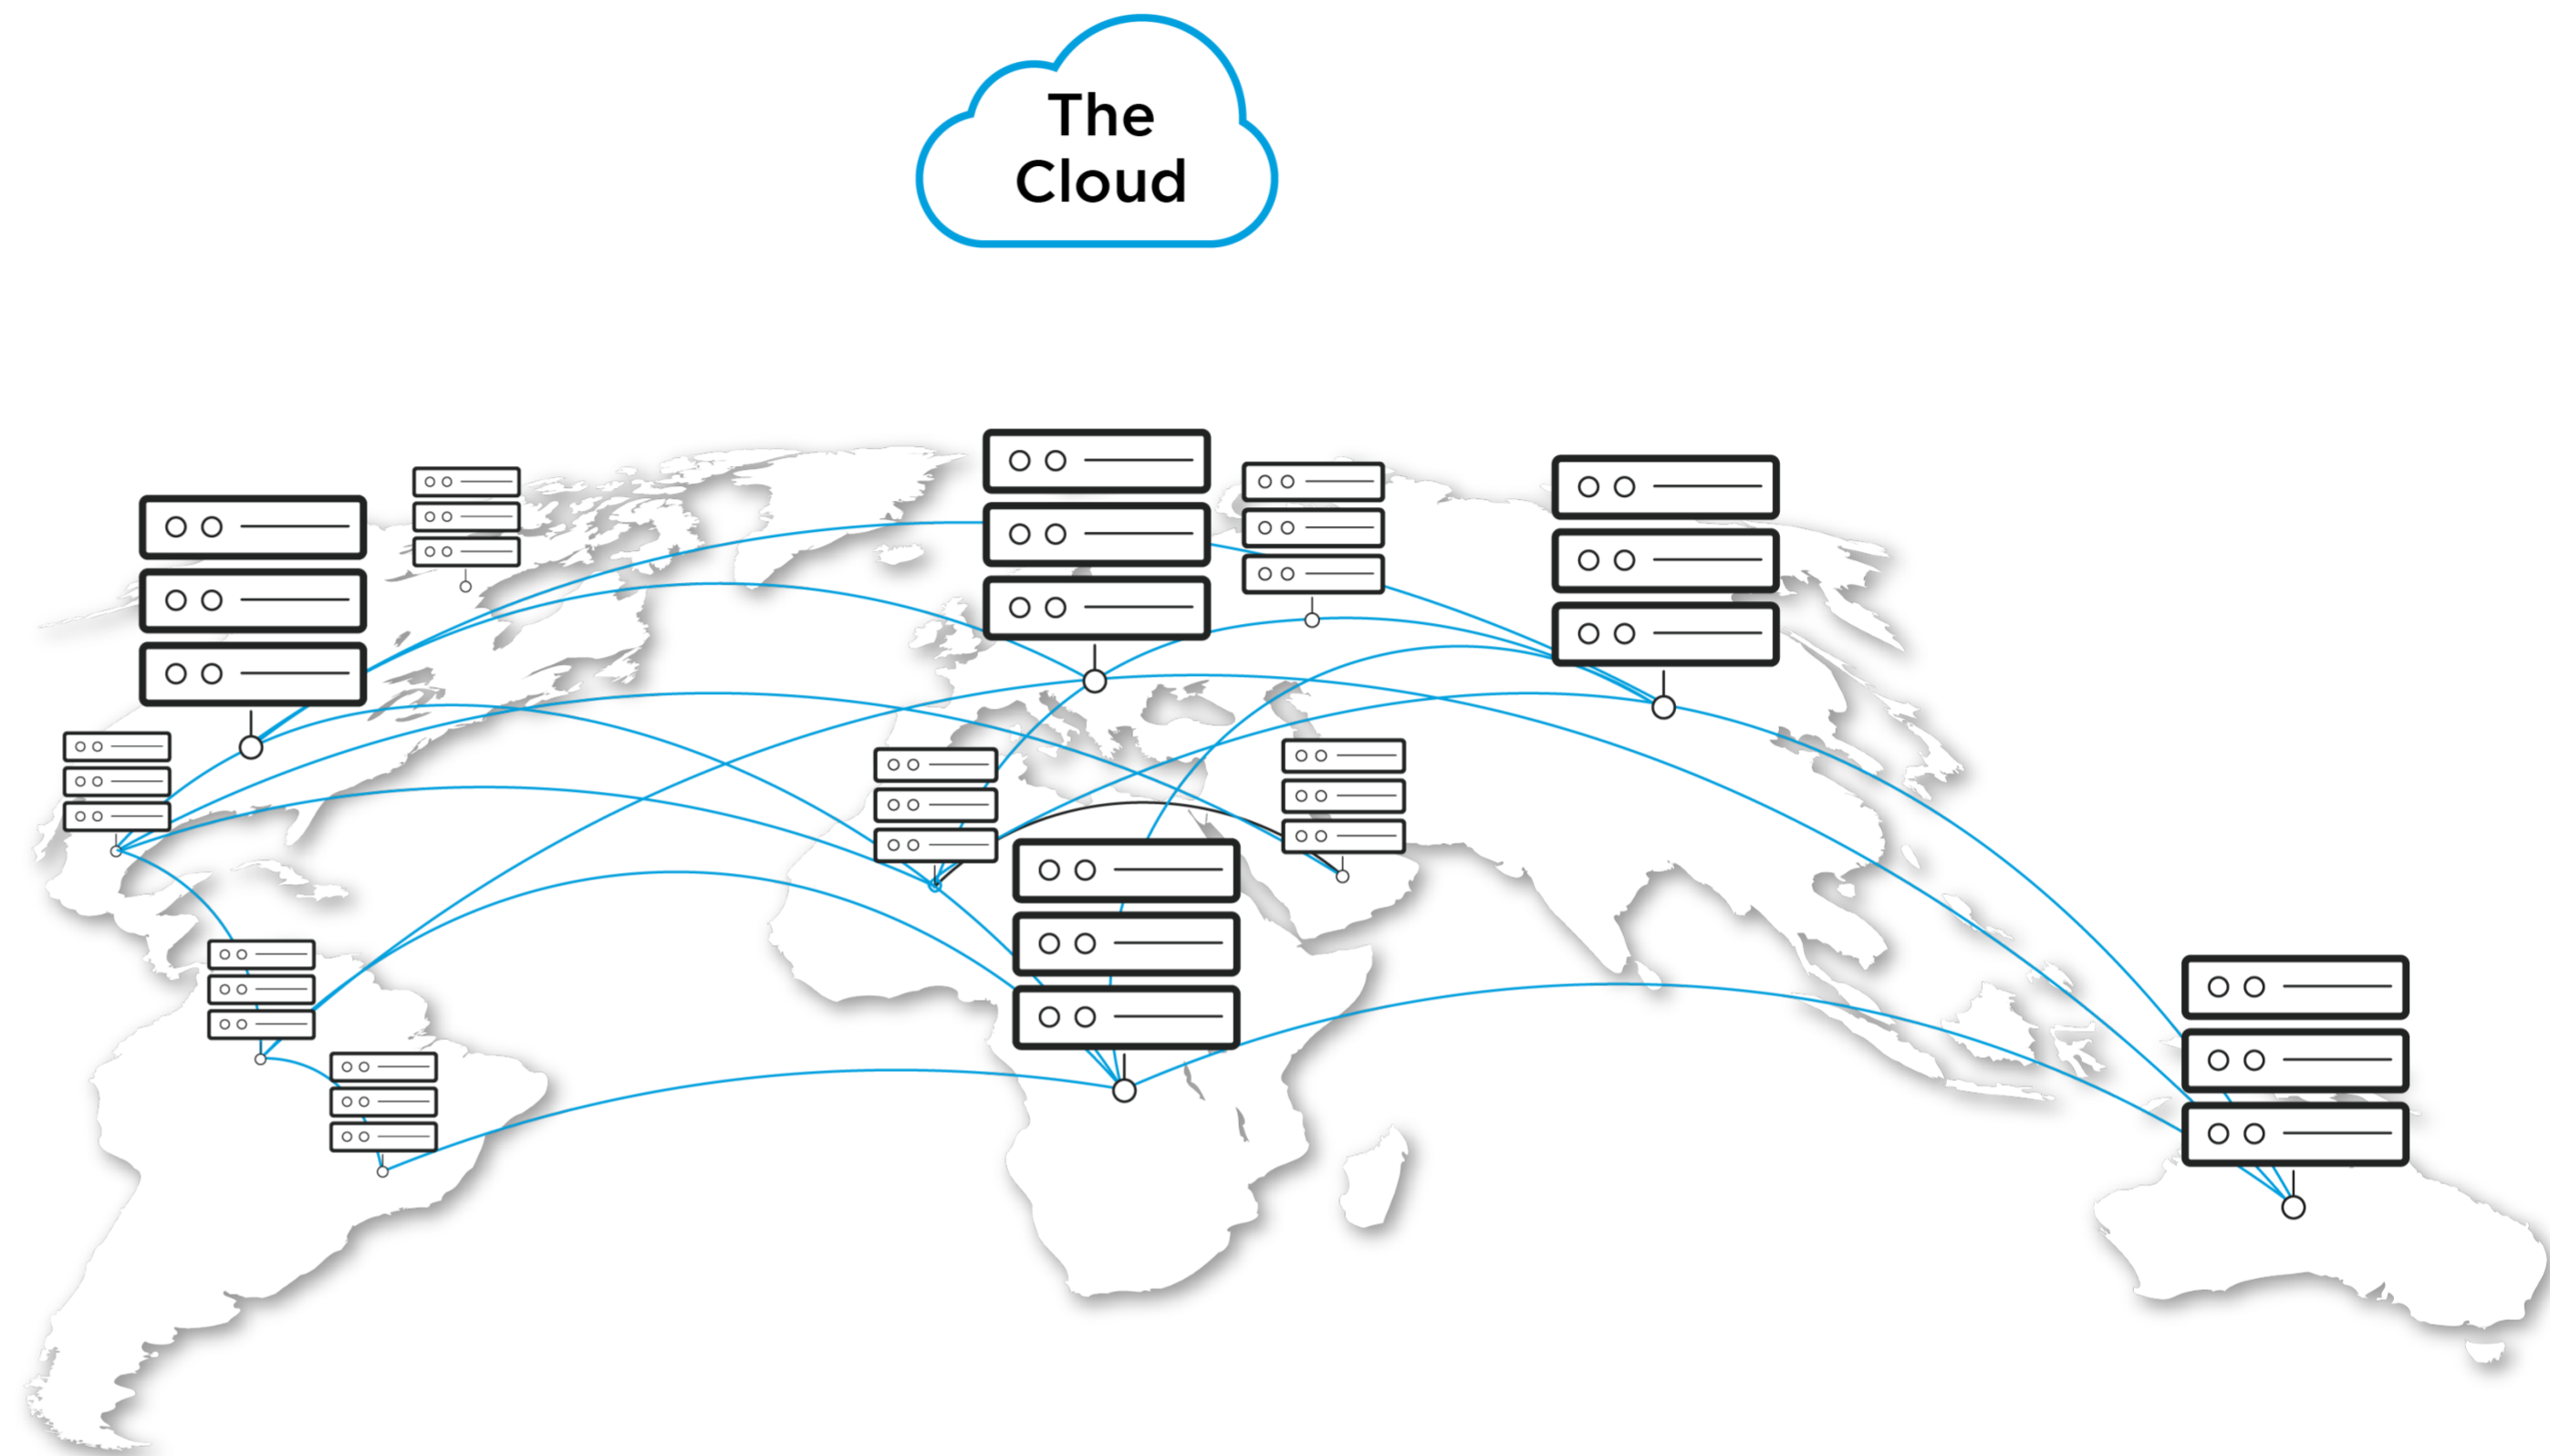

Disadvantages:

- Slow
- Data duplication
- High risk of data loss
- Poor security
- Non-scalable

To further
complicate matters...

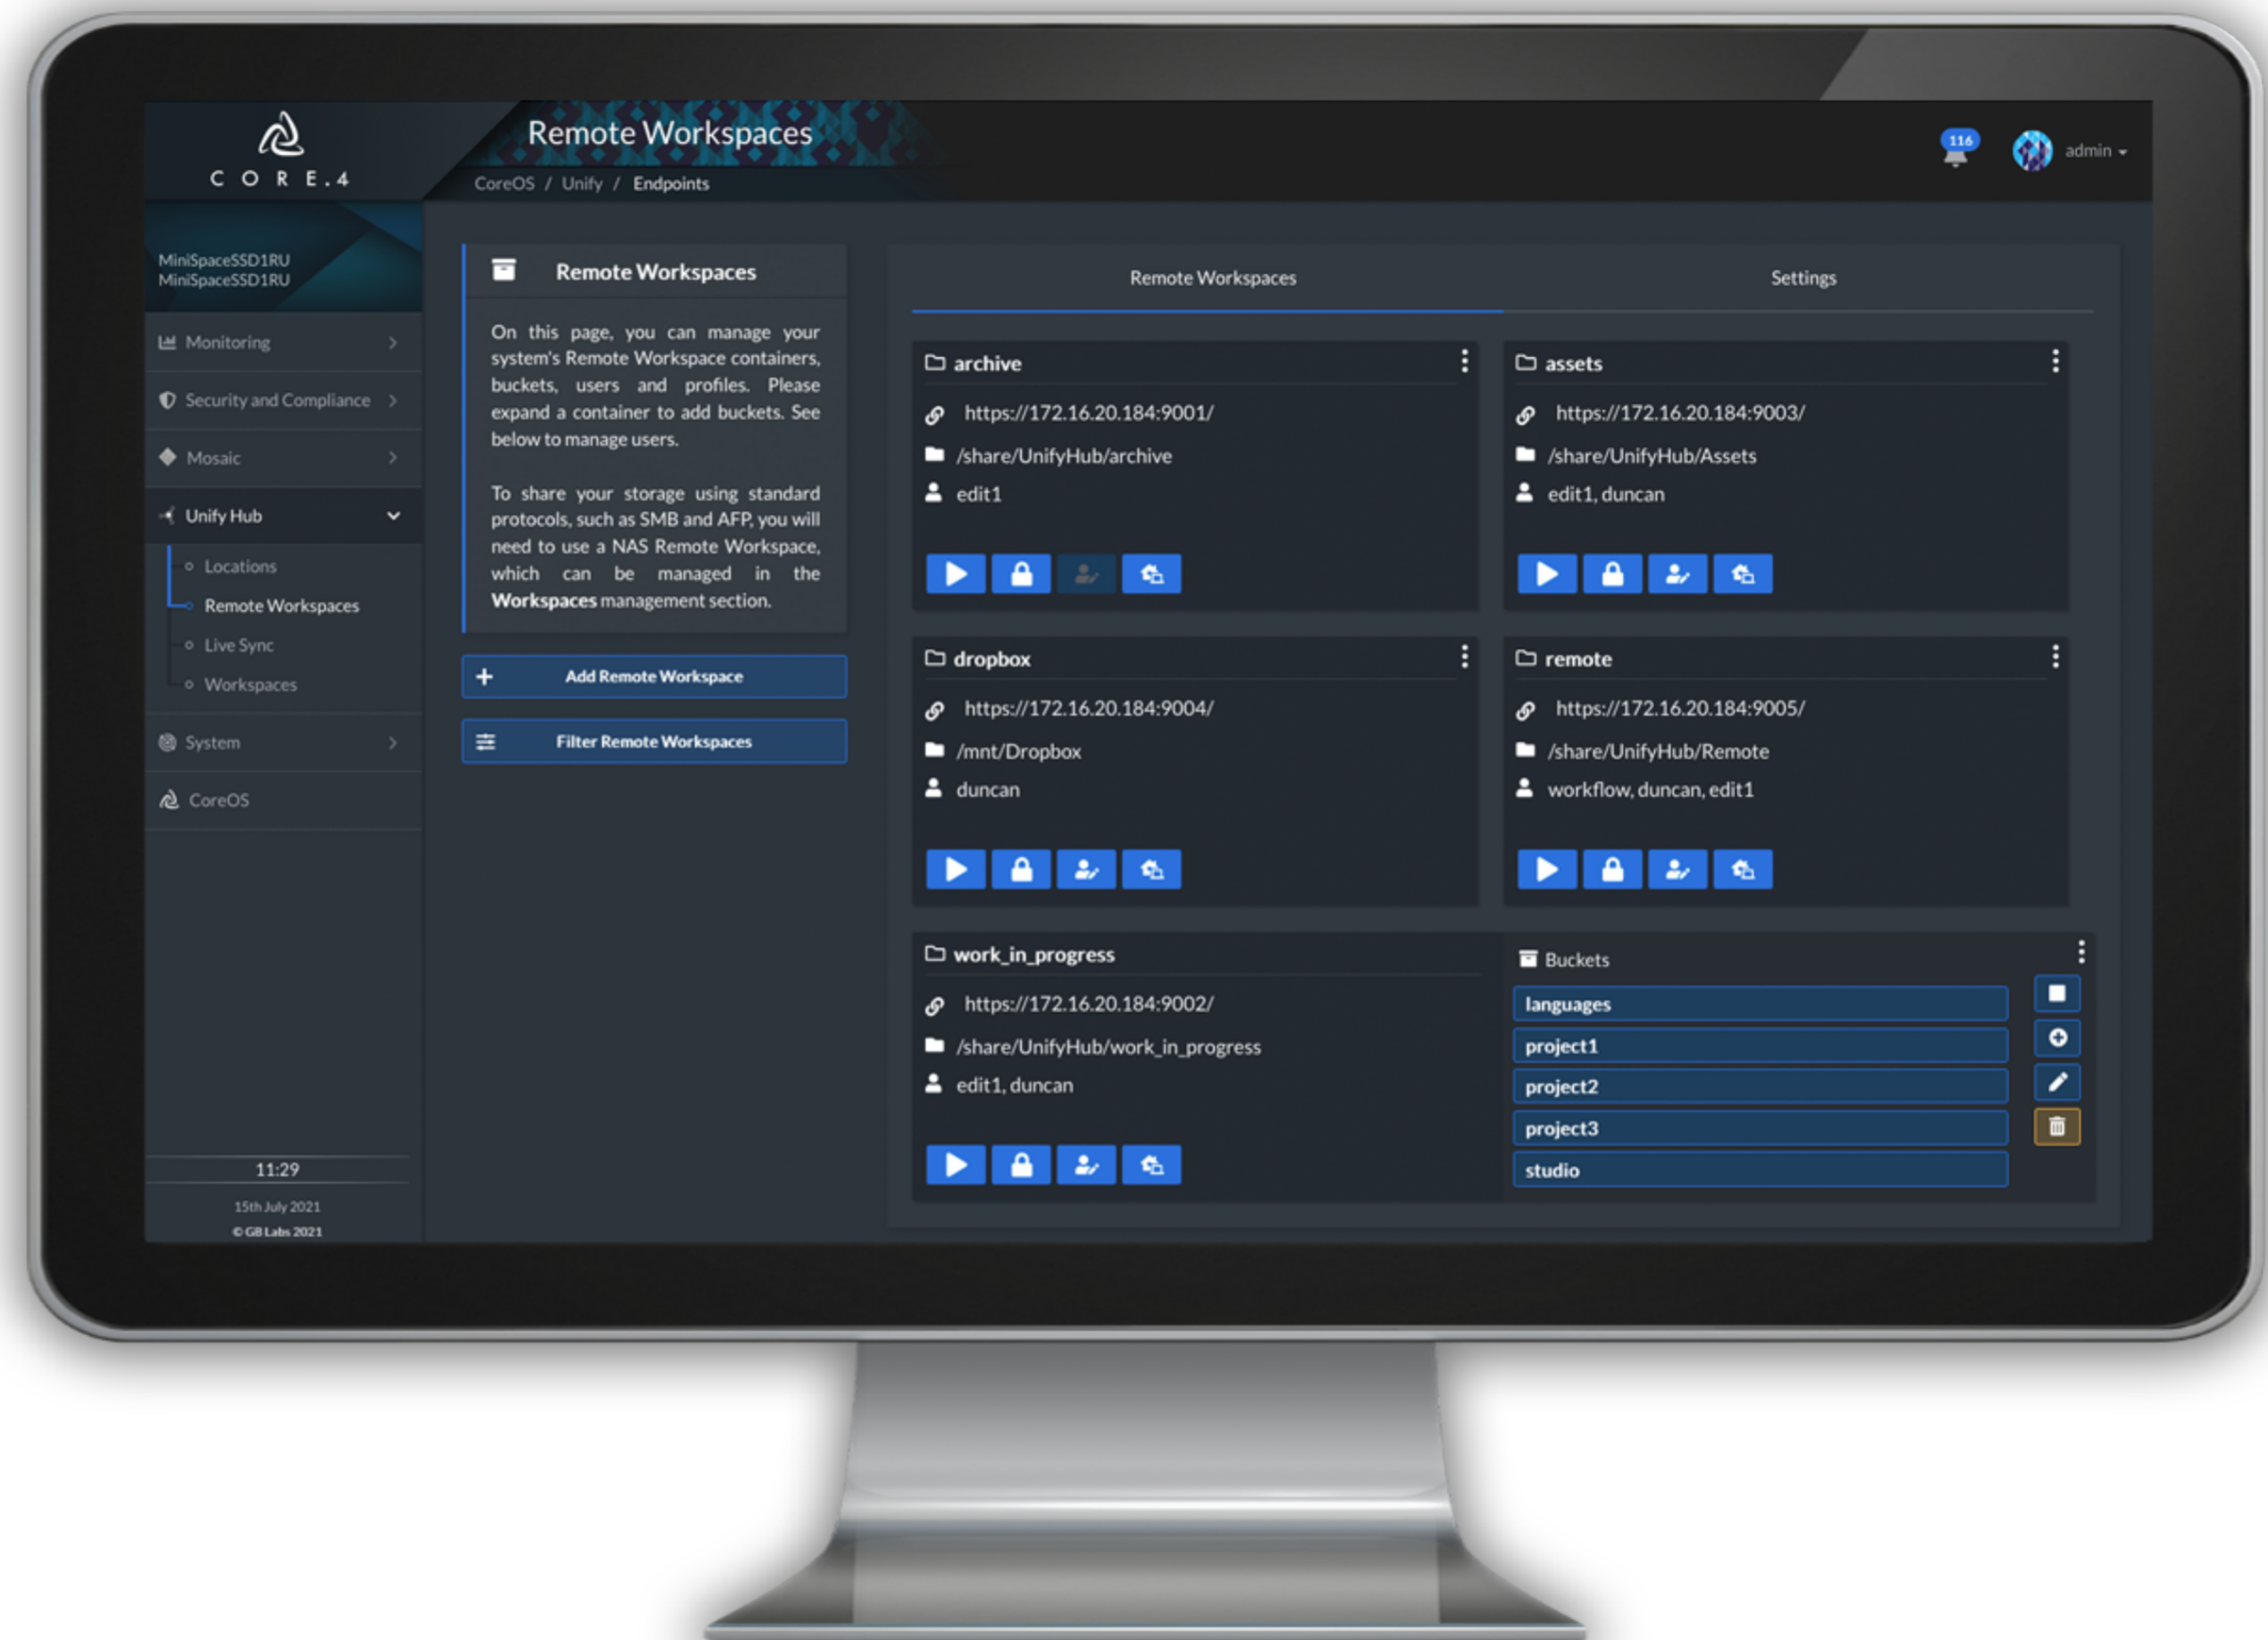

Millions of 'islands of
data' spread across the
Globe glued together
with high latency
internet connections

The new hub of collaboration

Seamless On-Premise,
Cloud & Remote
Integration

Introduction

There are two
significant parts to the
technology...

Cloud Integration & Remote Working

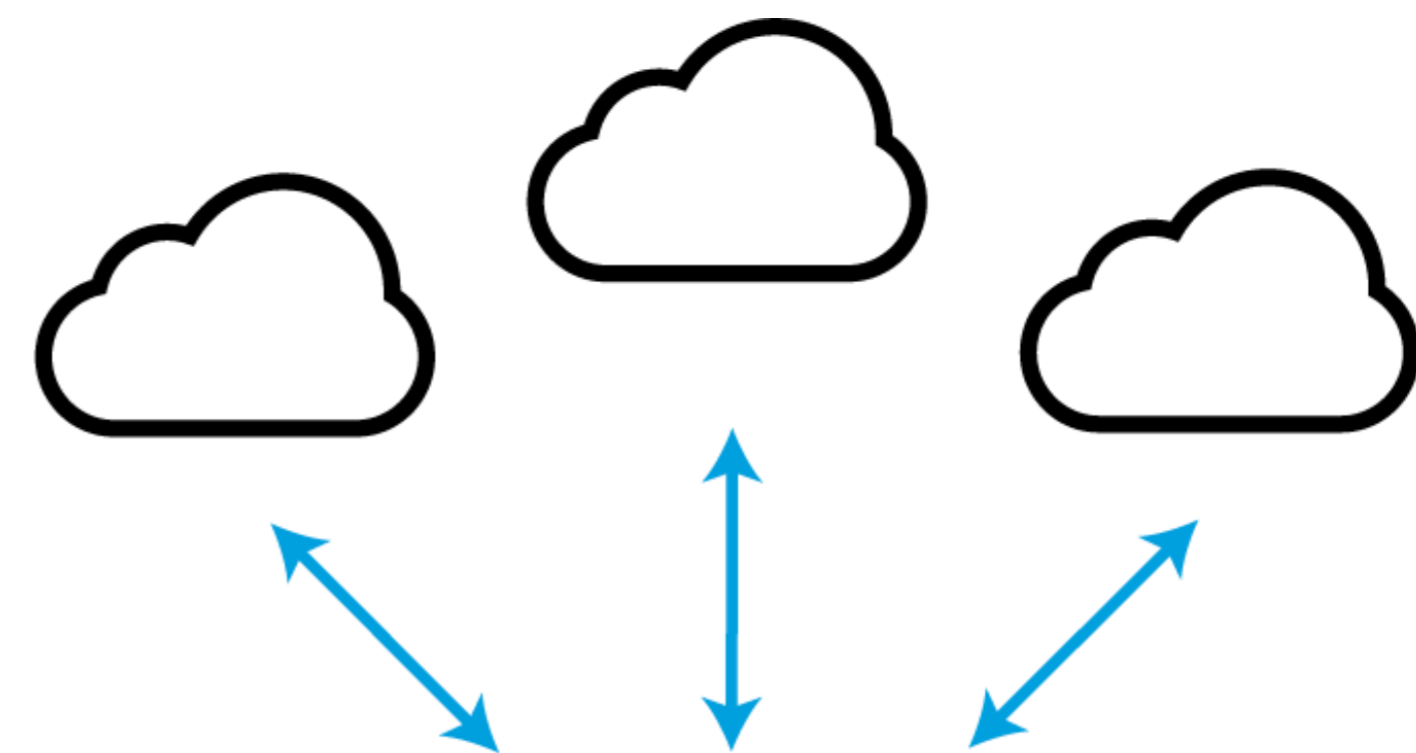

Cloud Integration

Secure single sign-on

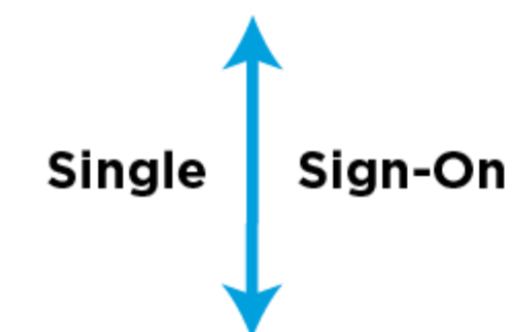

Advantages

Secure single SMB sign-on
Simplified user management

Supported cloud storage at release:

Multiple S3 Logins

Single Sign-On

Remote Users

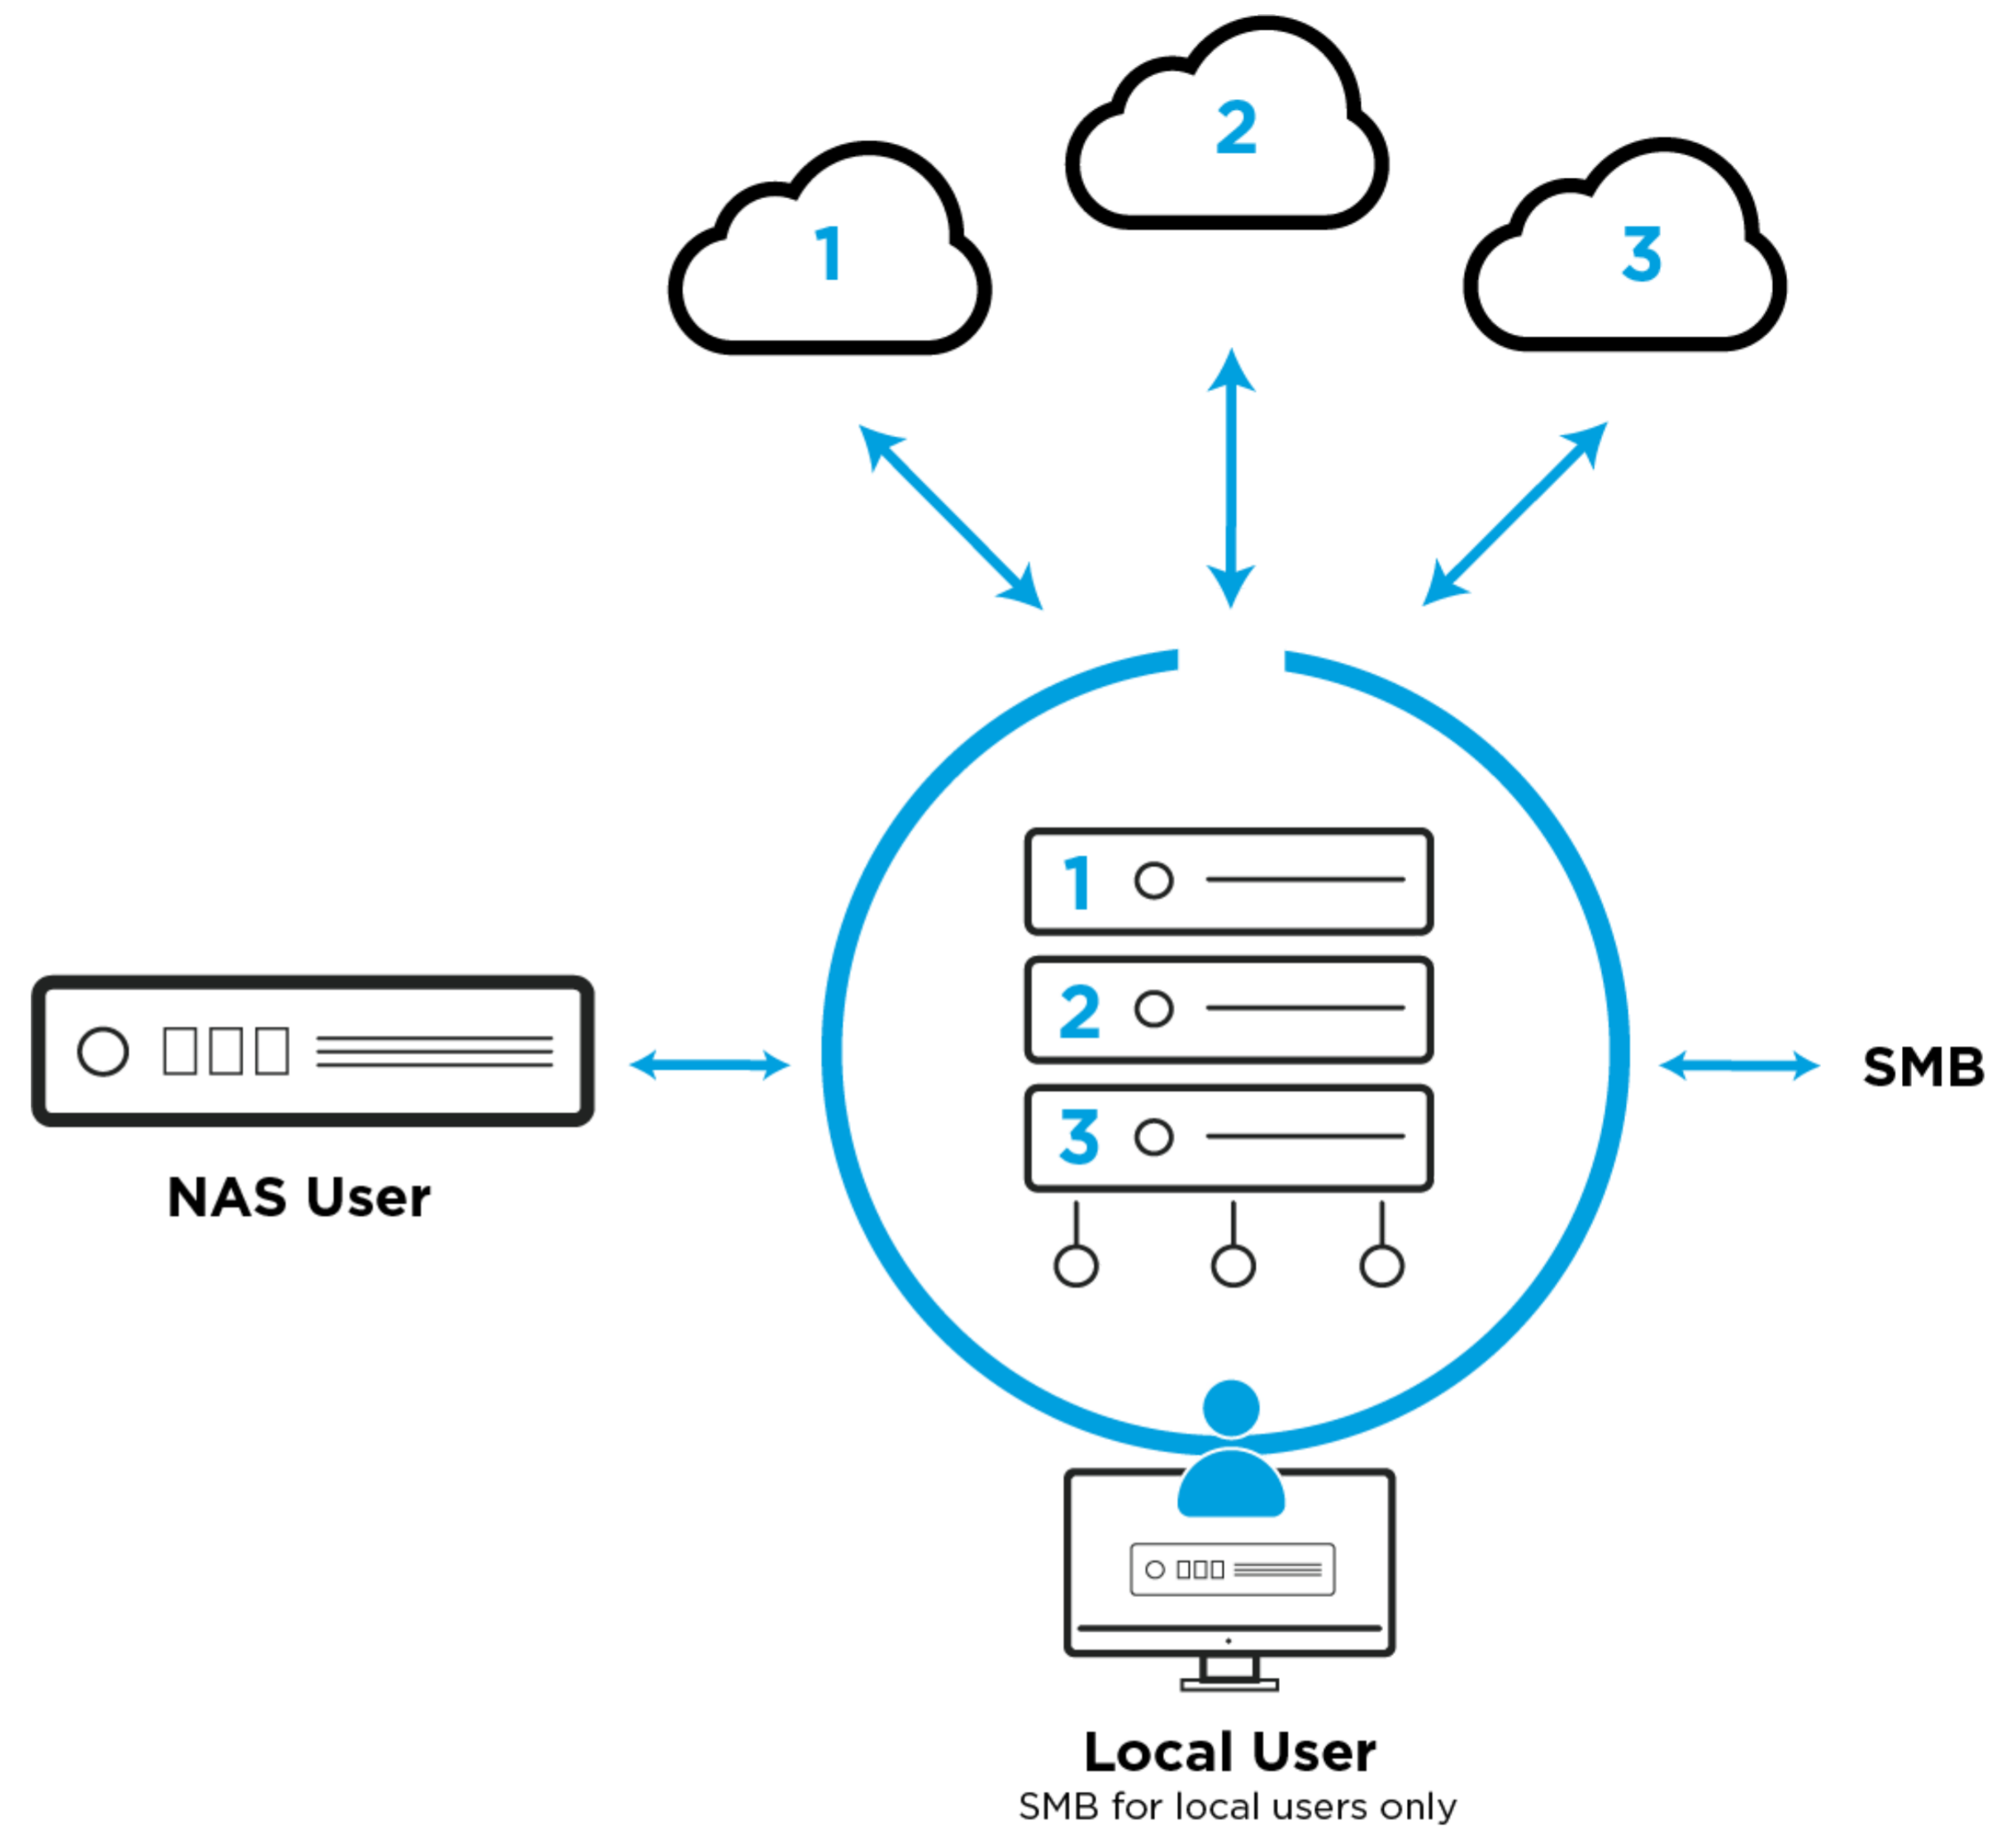

Cloud Integration

Cloud end points as SMB

Advantages

- Secure single SMB sign-on
- Simplified user management
- Cloud end points as SMB
- Enables auditing

Cloud Integration

'One pane of glass' data visibility

Advantages

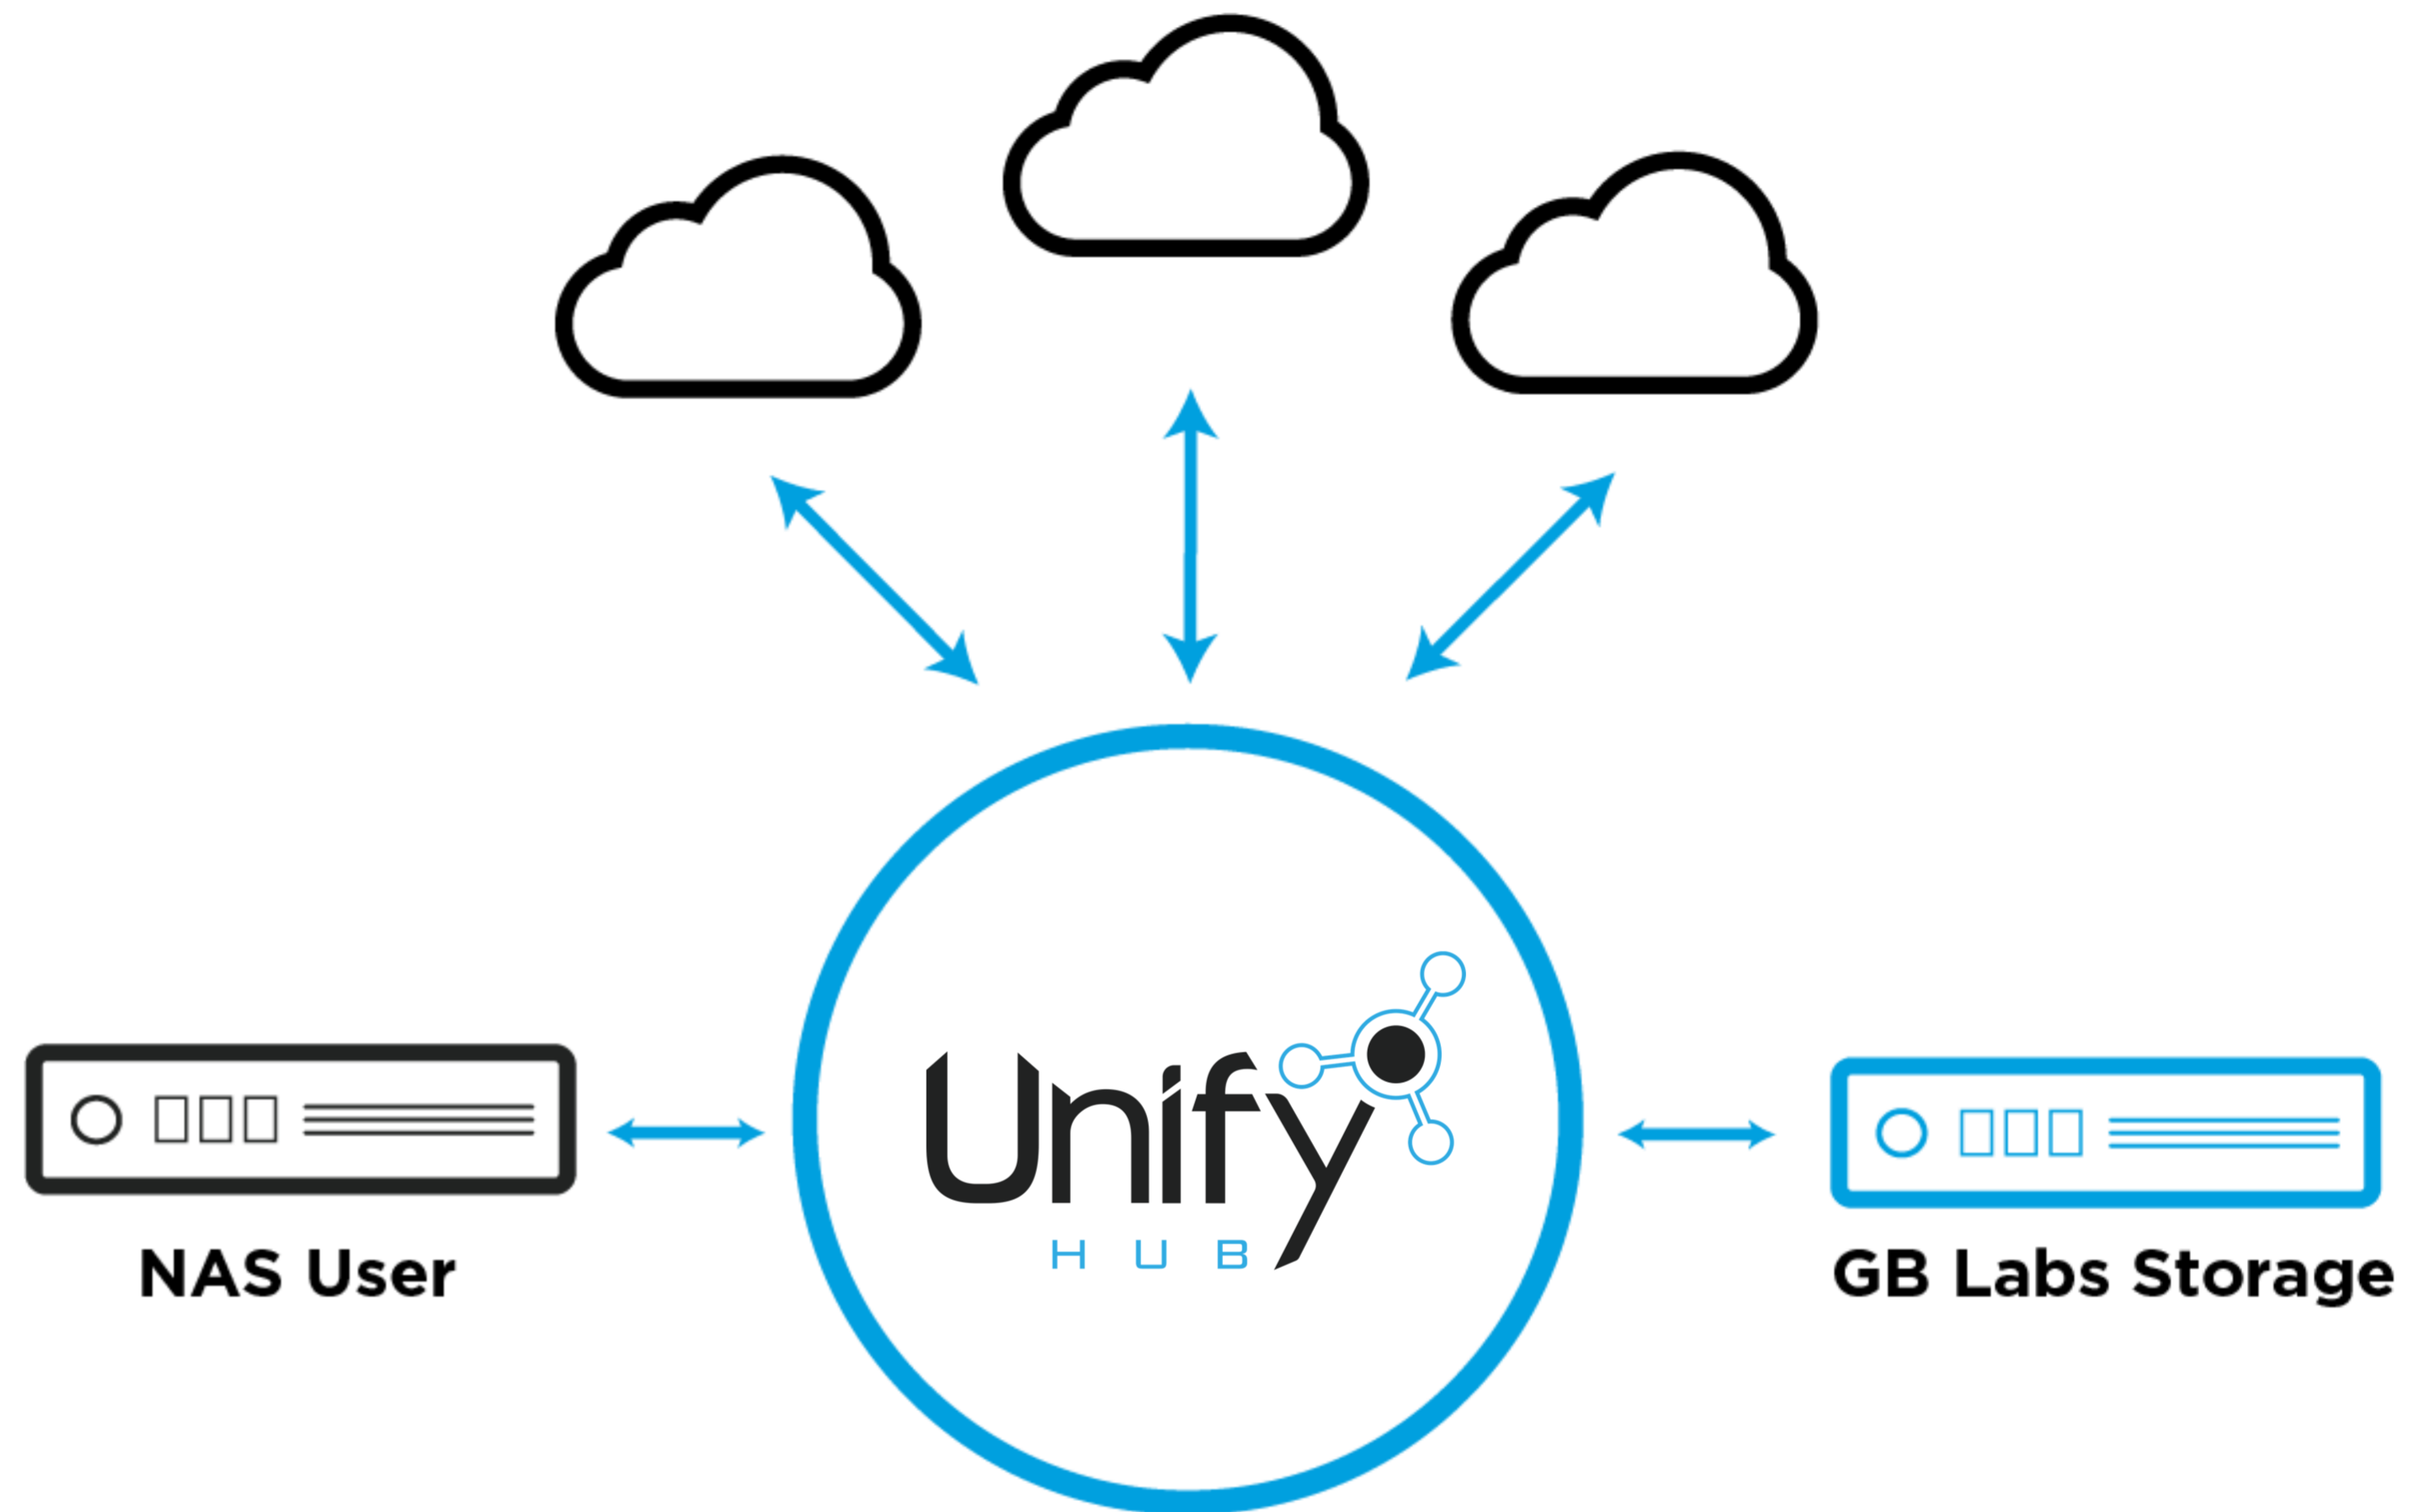

Secure single SMB sign-on

Simplified user management

Cloud end points as SMB

Enables auditing

'One pane of glass' data visibility

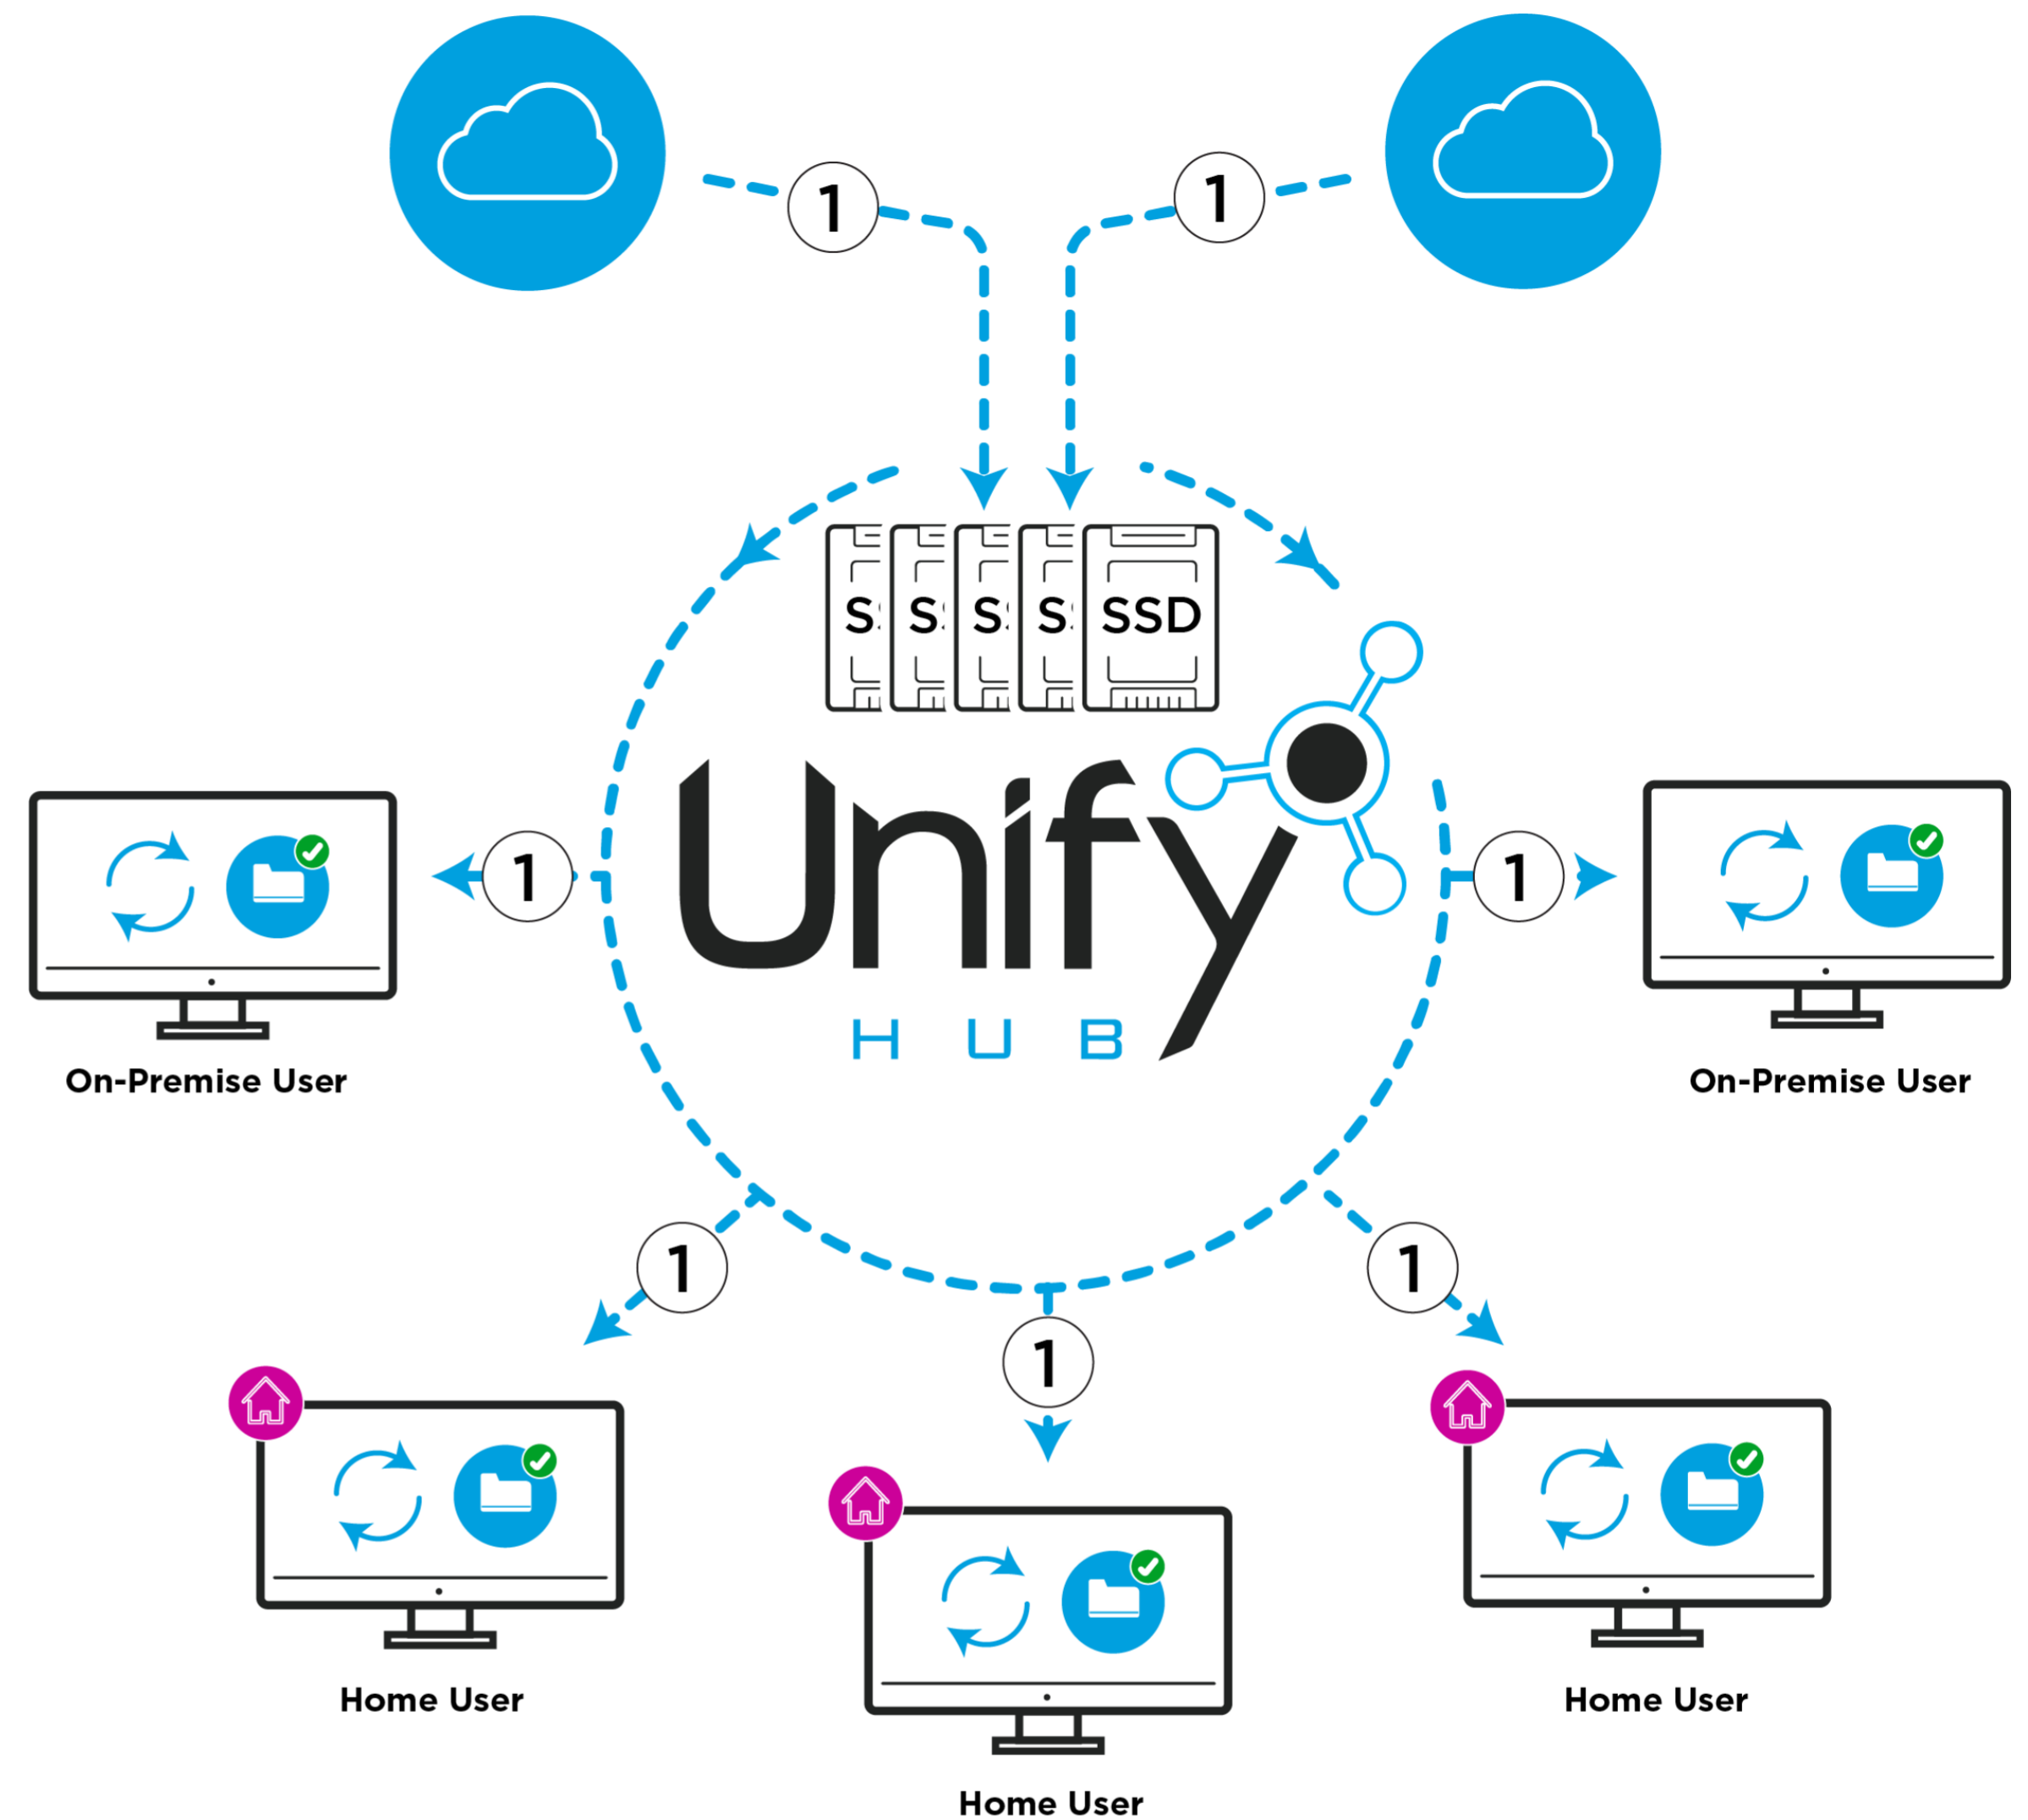

Cloud Integration

Cloud accounts feel like an on-premise service

Advantages

- Accelerated cloud access
- Smart cache saves egress
- Preserves internet bandwidth
- Saves time and money

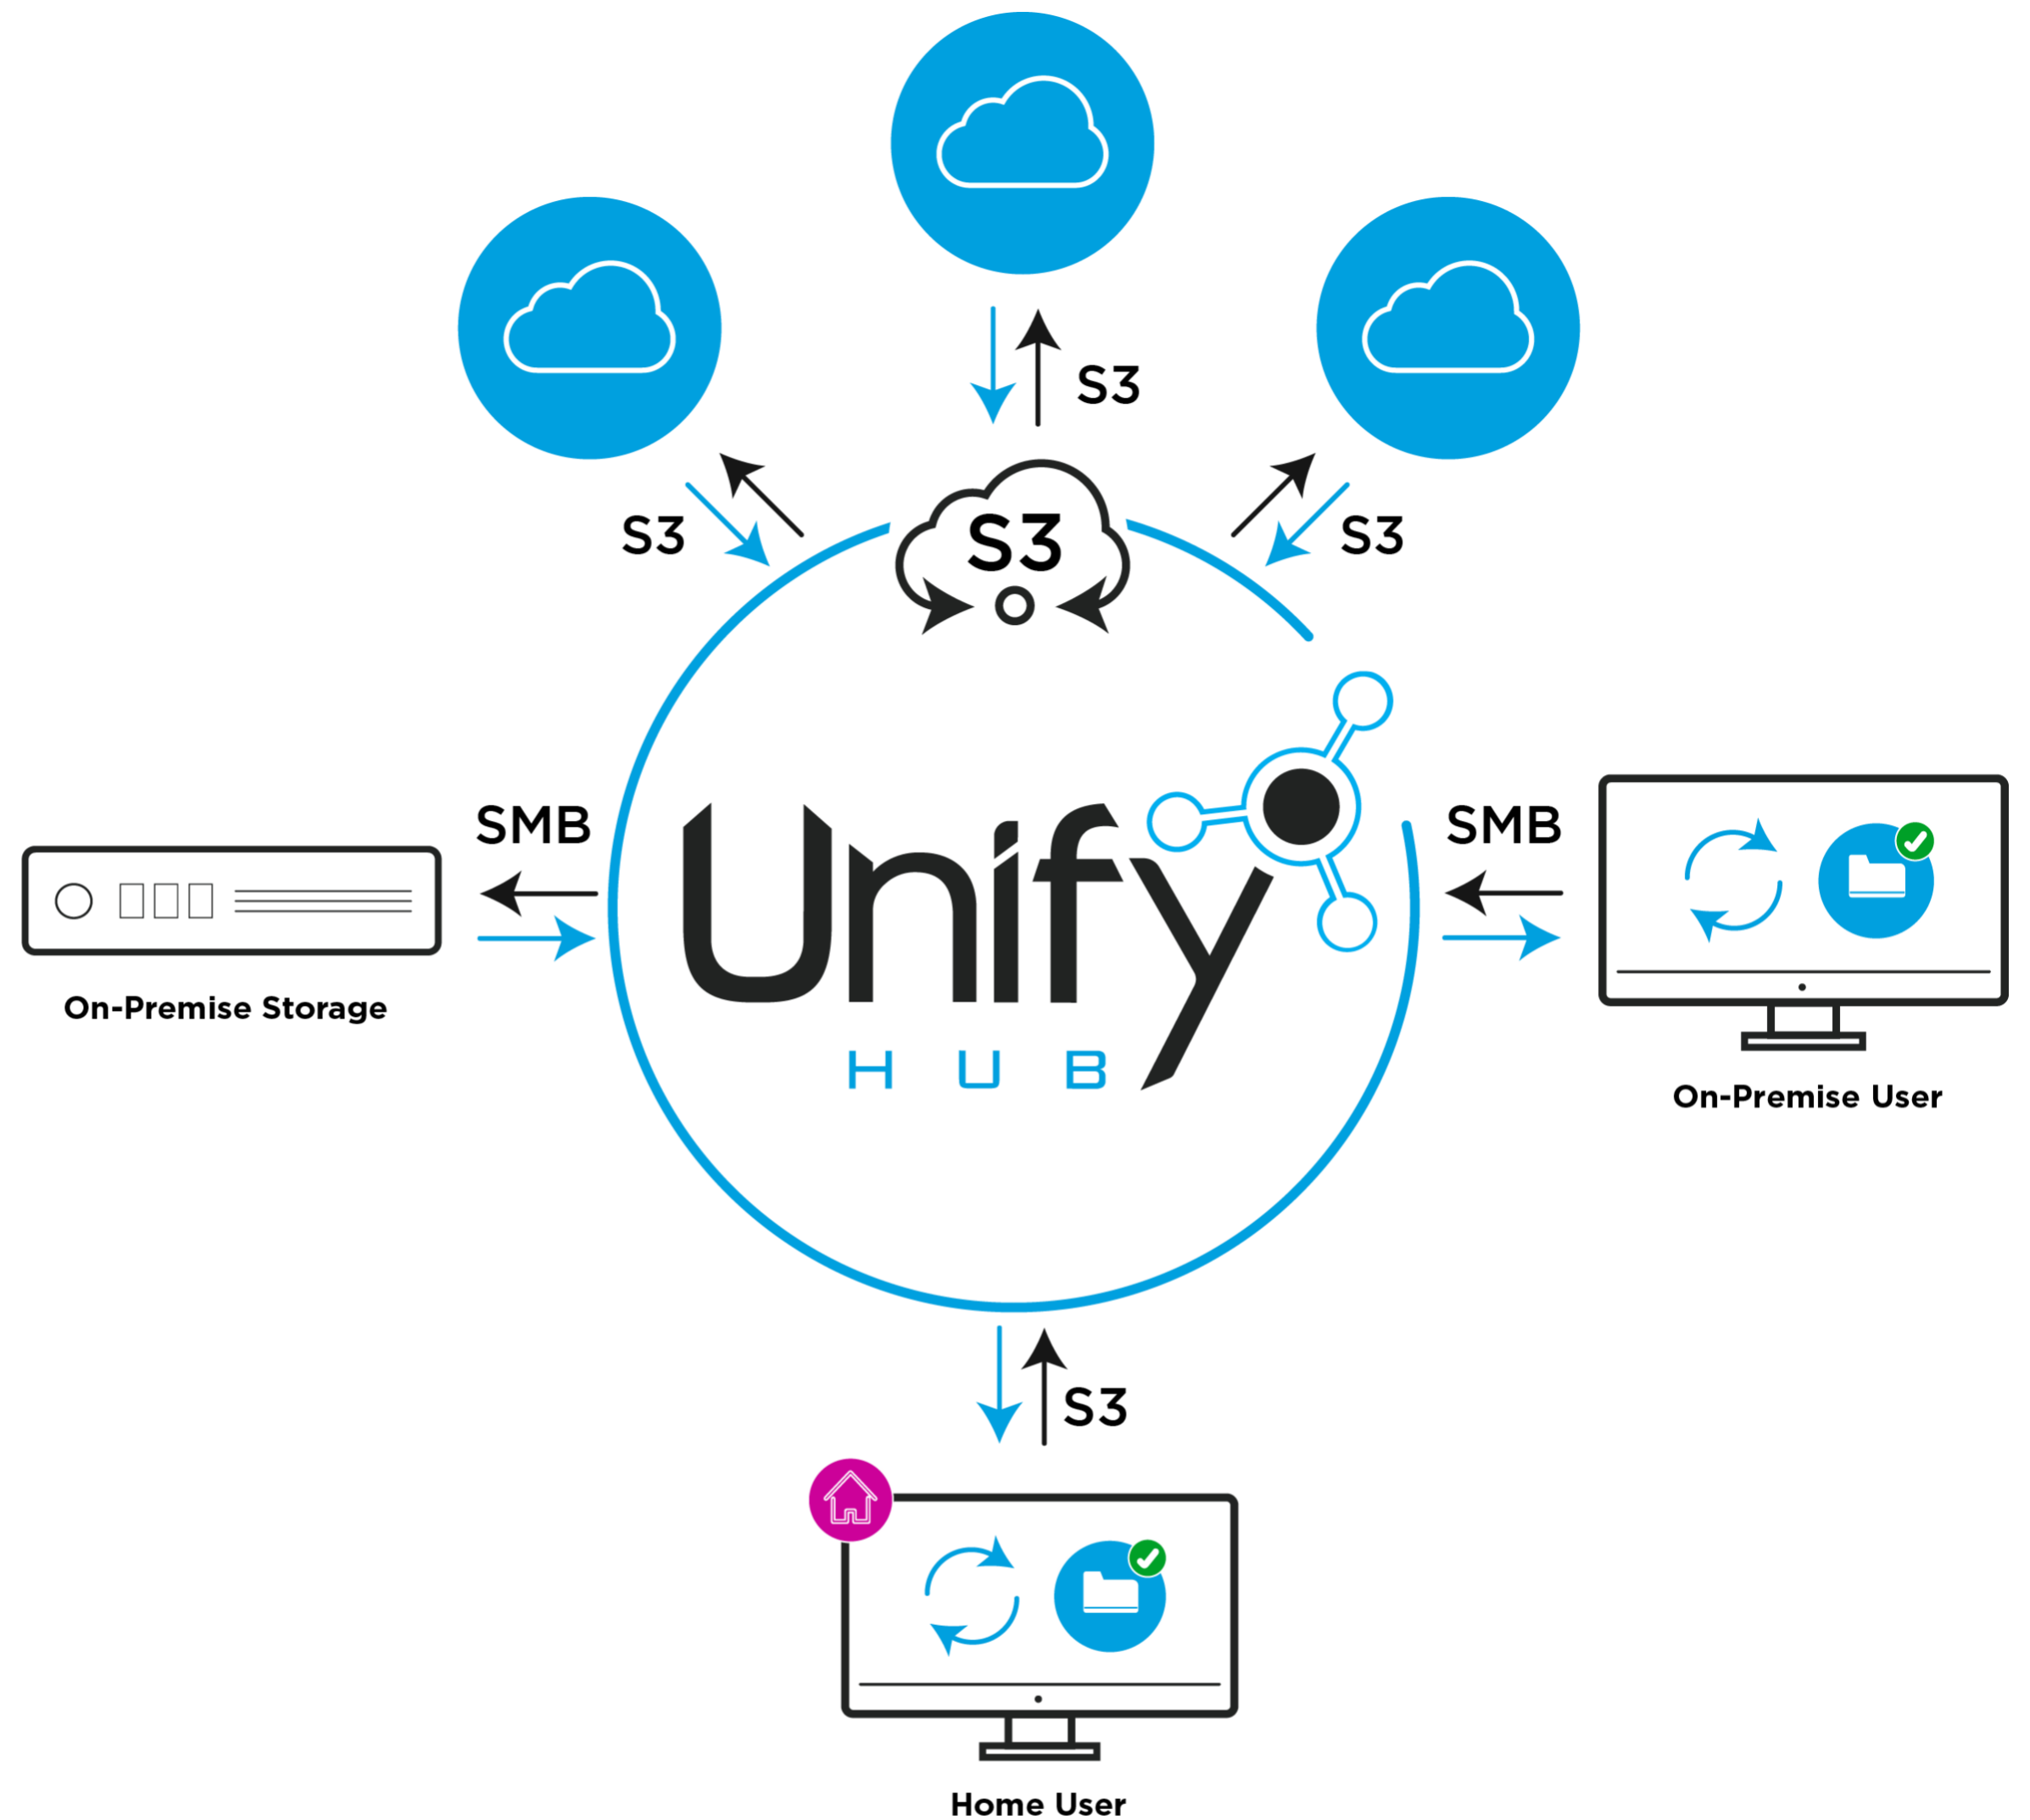

Cloud Integration

Connects on-premise workspaces to cloud services or remote users

Advantages

- Export as S3 end point
- Connect office to Cloud
- Supports existing storage
- Create a private cloud

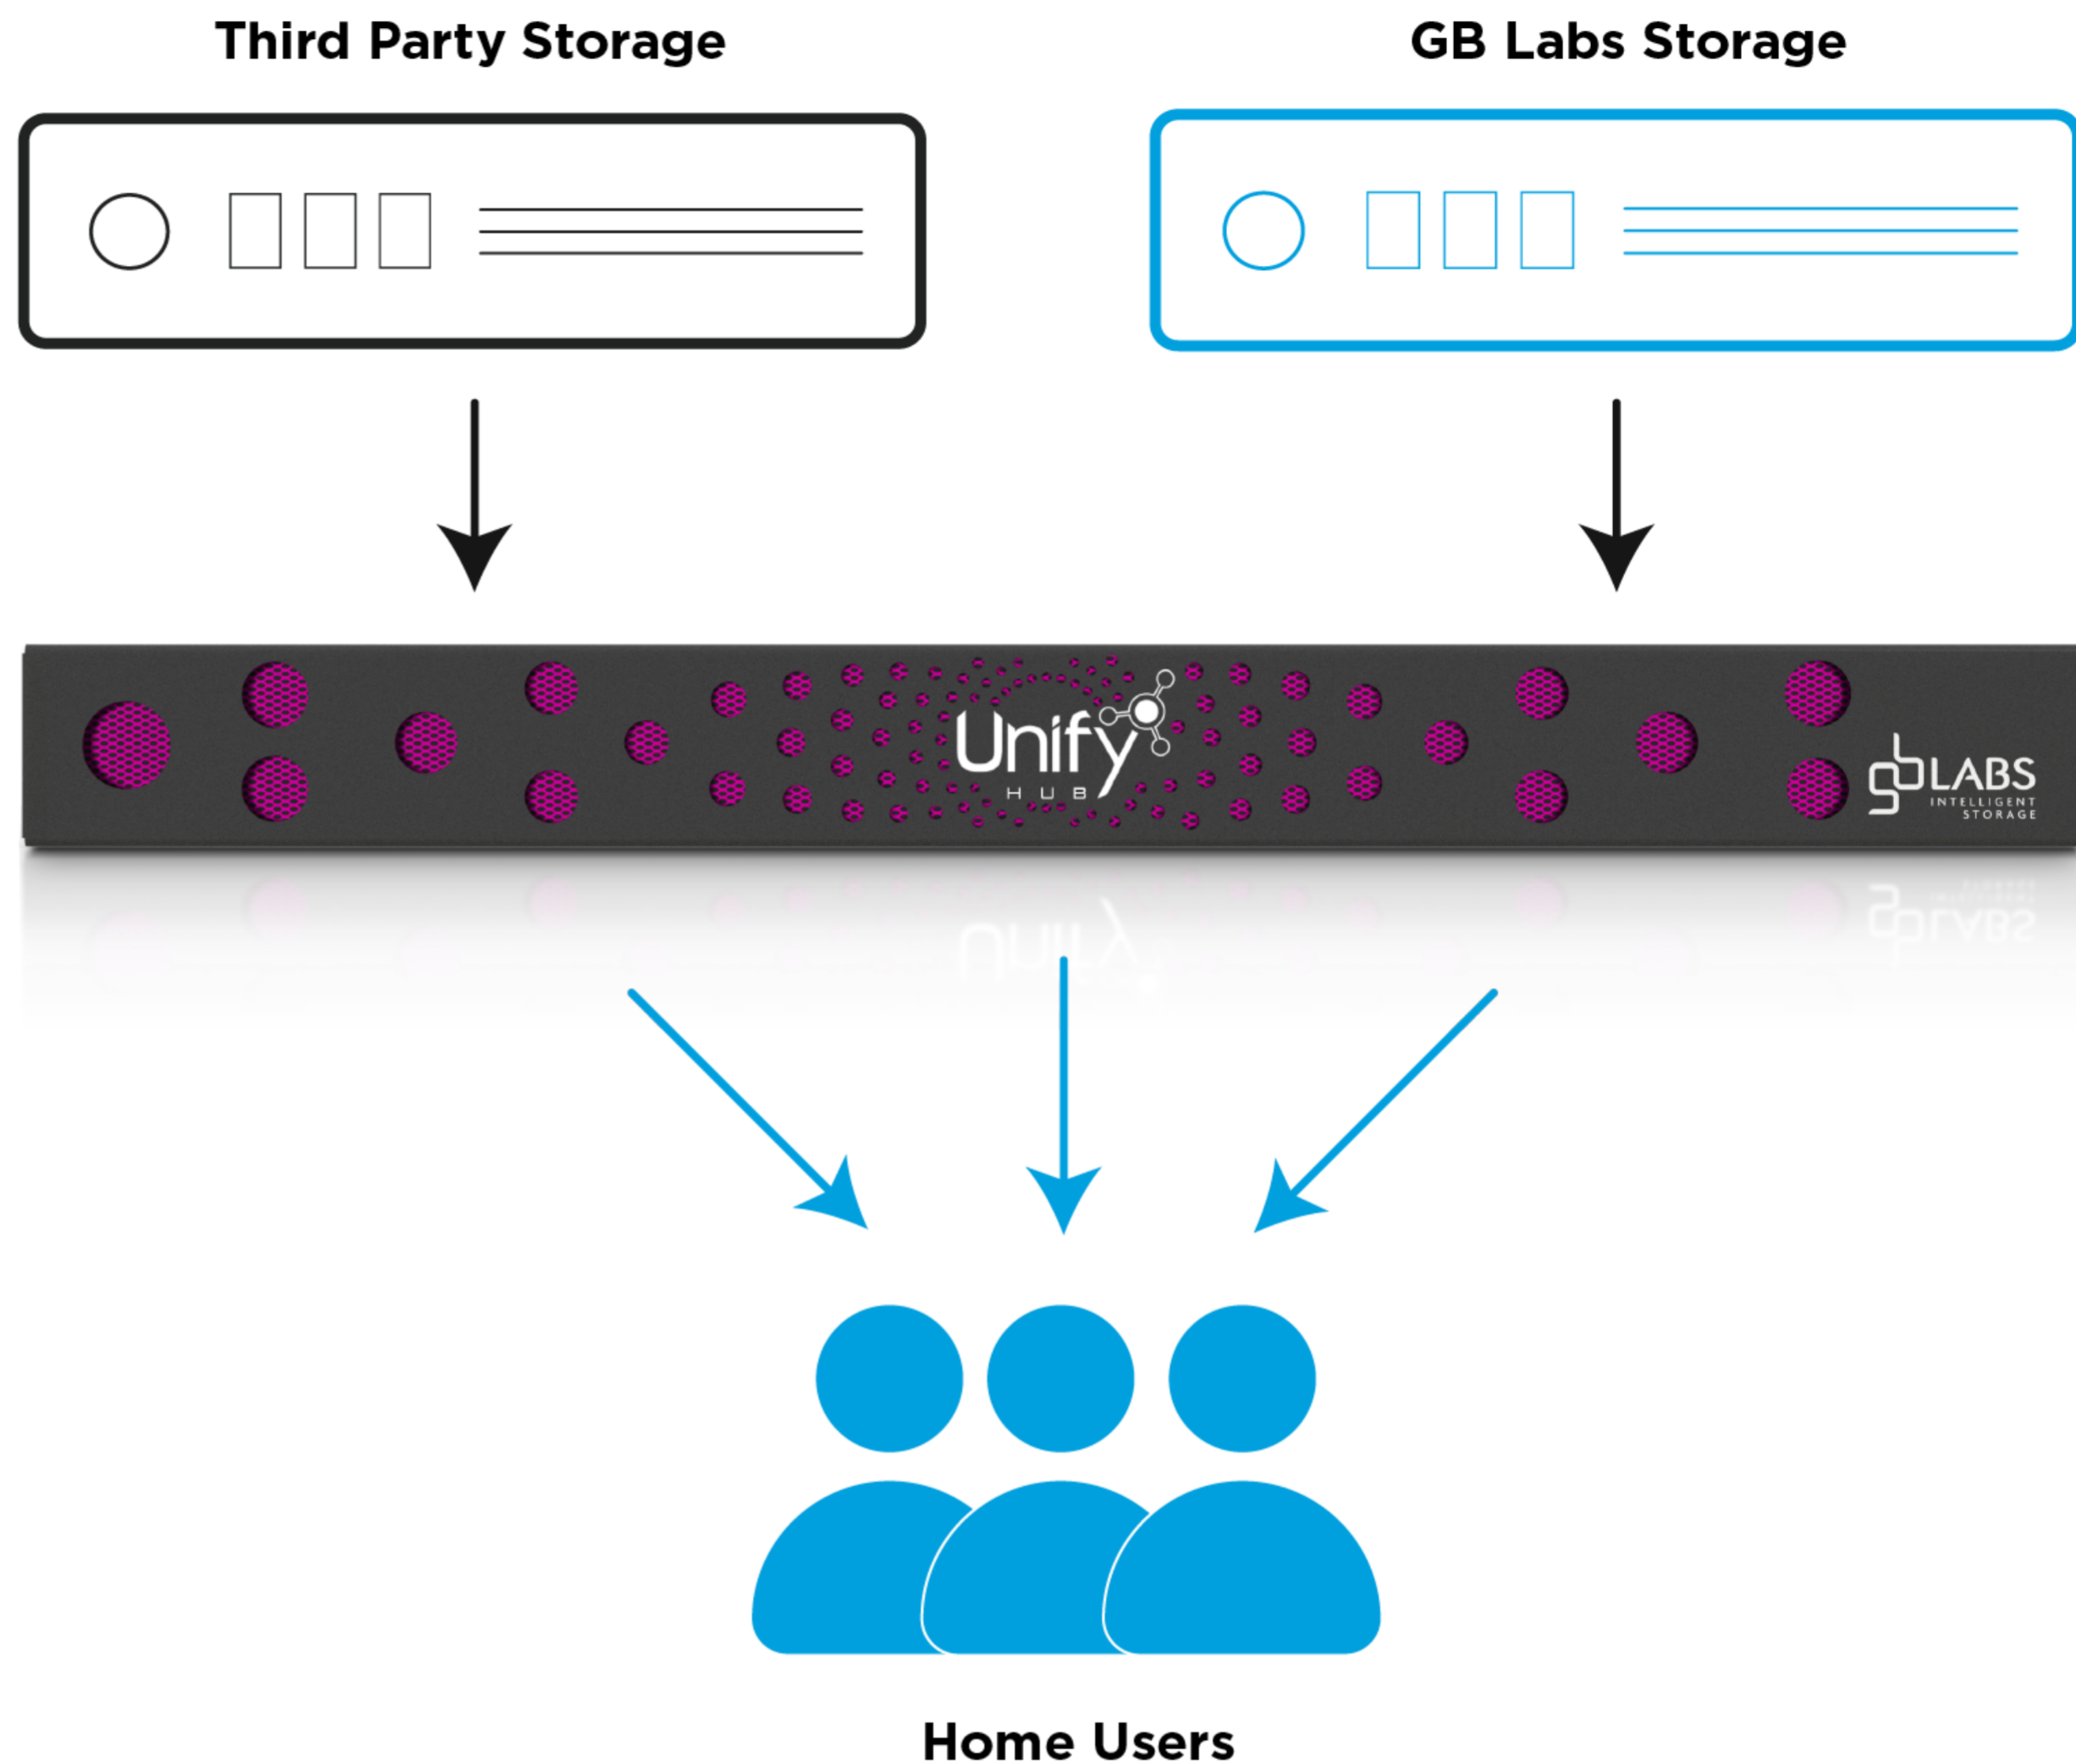

Remote Working

Get an on-premise
experience from home

Advantages

- Fast data access
- Secure
- One set of data
- Scalable
- Flexible

Remote Working

Unify Hub Connect software for
PC and Mac

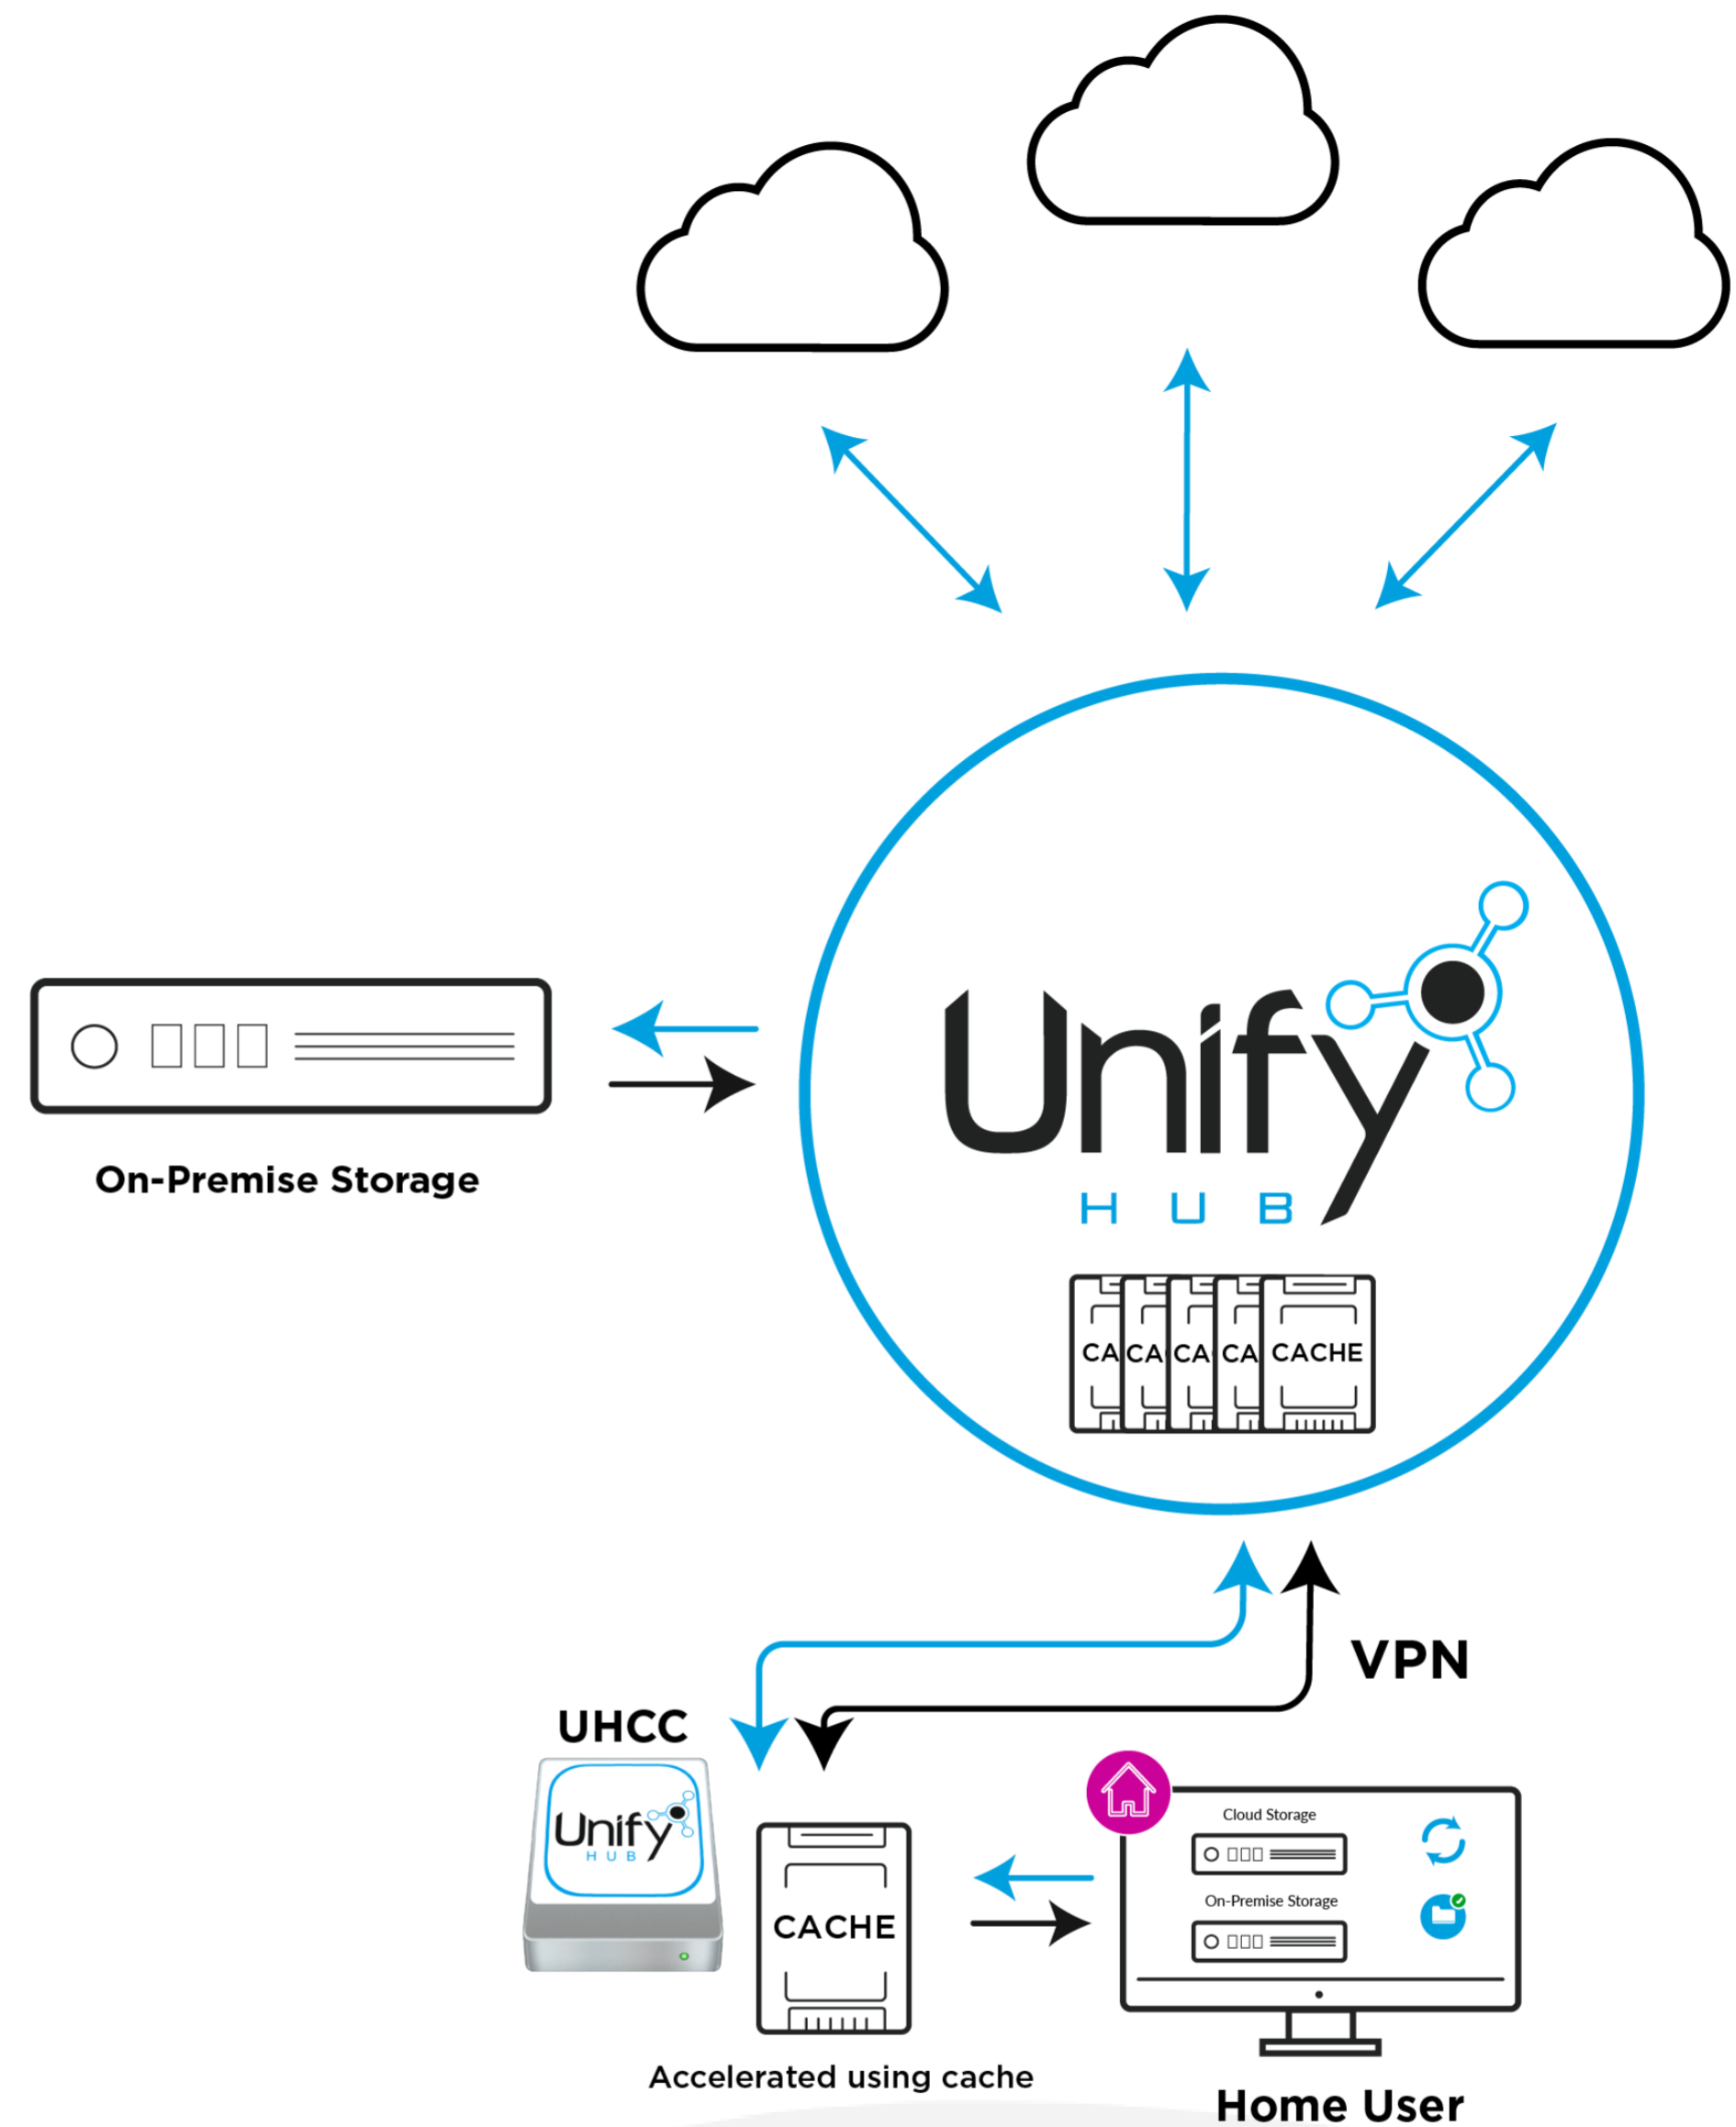

Advantages

Bi-directional sync to WIP

Intelligent acceleration

On-premise experience at home

UHCC - Unify Hub Connect Client
